Globalizing Domain-Specific Languages Benoit Combemale,Betty H.C. Cheng,Robert B. France,Jean-Marc Jézéquel,Bernhard Rumpe,2015-10-31 The development of modern complex software intensive systems often involves the use of multiple DSMLs that capture different system aspects Supporting coordinated use of DSMLs leads to what we call the globalization of modeling languages that is the use of multiple modeling languages to support coordinated development of diverse aspects of a system In this book a number of articles describe the vision and the way globalized DSMLs currently assist integrated DSML support teams working on systems that span many domains and concerns to determine how their work on a particular aspect influences work on other aspects Globalized DSMLs offer support for communicating relevant information and for coordinating development activities and associated technologies within and across teams in addition to providing support for imposing control over development artifacts produced by multiple teams DSMLs can be used to support socio technical coordination by providing the means for stakeholders to bridge the gap between how they perceive a problem and its solution and the programming technologies used to implement a solution They also support coordination of work across multiple teams DSMLs developed in an independent manner to meet the specific needs of domain experts have an associated framework that regulates interactions needed to support collaboration and work coordination across different system domains The articles in the book describe how multiple heterogeneous modeling languages or DSMLs can be related to determine how different aspects of a system influence each other The book includes a research roadmap that broadens the current DSML research focus beyond the development of independent DSMLs to one that provides support for globalized DSMLs

**Globalizing Domain-Specific Languages** Benoit Combemale,Betty H.C. Cheng,Robert B. France,Jean-Marc Jézéquel,Bernhard Rumpe,2015 The development of modern complex software intensive systems often involves the use of multiple DSMLs that capture different system aspects Supporting coordinated use of DSMLs leads to what we call the globalization of modeling languages that is the use of multiple modeling languages to support coordinated development of diverse aspects of a system In this book a number of articles describe the vision and the way globalized DSMLs currently assist integrated DSML support teams working on systems that span many domains and concerns to determine how their work on a particular aspect influences work on other aspects Globalized DSMLs offer support for communicating relevant information and for coordinating development activities and associated technologies within and across teams in addition to providing support for imposing control over development artifacts produced by multiple teams DSMLs can be used to support socio technical coordination by providing the means for stakeholders to bridge the gap between how they perceive a problem and its solution and the programming technologies used to implement a solution They also support coordination of work across multiple teams DSMLs developed in an independent manner to meet the specific needs of domain experts have an associated framework that regulates interactions needed to support collaboration and work coordination across different

system domains The articles in the book describe how multiple heterogeneous modeling languages or DSMLs can be related to determine how different aspects of a system influence each other The book includes a research roadmap that broadens the current DSML research focus beyond the development of independent DSMLs to one that provides support for globalized DSMLs

*Digital Transformation* Birgit Vogel-Heuser,Manuel Wimmer,2023-02-02 Digital Transformation in Industry 4 0 5

0 requires the effective and efficient application of digitalization technologies in the area of production systems This book elaborates on concepts techniques and technologies from computer science in the context of Industry 4 0 5 0 and

demonstrates their possible applications Thus the book serves as an orientation but also as a reference work for experts in the field of Industry 4 0 5 0 to successfully advance digitization in their companies

*Machine Intelligence for Research and Innovations* Om Prakash Verma,Lipo Wang,Rajesh Kumar,Anupam Yadav,Ranjeet Kumar Rout,2026-01-01 The book is a

collection of high quality peer reviewed research papers presented in the Second International Conference on MAchine inTelligence for Research Innovations MAiTRI 2024 Summit held at National Institute of Technology Srinagar India during 21 23 June 2024 This book focuses on recent advancement in the theory and realization of machine intelligence MI and their tools and growing applications such as machine learning deep learning quantum machine learning real time computer vision pattern recognition natural language processing statistical modelling autonomous vehicles human interfaces computational

intelligence and robotics

globalization and also develop new ones

Second Handbook of Research on Mathematics Teaching and Learning Frank K.

Lester,2007-02-01 The audience remains much the same as for the 1992 Handbook namely mathematics education

researchers and other scholars conducting work in mathematics education This group includes college and university faculty graduate students investigators in research and development centers and staff members at federal state and local agencies

that conduct and use research within the discipline of mathematics The intent of the authors of this volume is to provide

useful perspectives as well as pertinent information for conducting investigations that are informed by previous work The Handbook should also be a useful textbook for graduate research seminars In addition to the audience mentioned above the present Handbook contains chapters that should be relevant to four other groups teacher educators curriculum developers state and national policy makers and test developers and others involved with assessment Taken as a whole the chapters reflects the mathematics education research community s willingness to accept the challenge of helping the public understand what mathematics education research is all about and what the relevance of their research fi ndings might be for those outside their immediate community

**Domain-Specific Languages** Walid Mohamed Taha,2009-07-06 Dijkstra once wrote that computer science is no more about computers than astronomy is about telescopes Despite the many incredible advances in computer science from times that predate practical mechanical computing there is still a myriad of fundamental questions in understanding the interface between computers and the rest of the world Why is it still hard to mechanize many tasks that seem to be fundamentally routine even as we see ever increasing pacity for raw mechanical computing The disciplined study of domain specific languages DSLs is an emerging area in computer science and is one which has the potential to revolutionize the eld and bring us closer to answering this question DSLs are formalisms that have four general characteristics They relate to a well de ned domain of discourse be it controlling tra c lights or space ships They have well de ned notation such as the ones that exist for prescribing music dance routines or strategy in a football game The informal or intuitive meaning of the notation is clear This can easily be overlooked especially since intuitive meaning can be expressed by many di erent notations that may be received very di erently by users The formal meaning is clear and mechanizable as is hopefully the case for the instructions we give to our bank or to a merchant online
