The Survey of Best Practices in Developing Online Information Literacy Tutorials 06/2013 Primary Research Group, 2013
The Survey of Best Practices in Developing Online Information Literacy Tutorials is a benchmarking report for online tutorial development presenting a wealth of information on the practices involved in and the cost of developing online information literacy tutorials. The 285 page report also looks at how tutorials are marketed and accessed and at popular access points such as Facebook, the library website and others as well as how tutorials are used in for credit classes and more ad hoc use. The study looks at how tutorial designers are trained and at how they inter relate to non library departments and other departments of the library. The study also looks at the use of tutorials of other colleges and vendor produced tutorials and at efforts to evaluate how students use tutorials and how colleges should make decisions on what kinds of tutorials to produce and how to best produce them. The questionnaire for the report was largely developed by librarians at the University of Arizona libraries.

TACCLE Graham Attwell, 2009
This book is written for classroom teachers who want to know more about e learning and who would like to experiment with designing e learning material to use in their own classrooms. It is primarily targeted at secondary teachers but there is no reason why primary school teachers and adult education teachers should not find it useful too. The other group we had in mind were those of you still undertaking initial teacher training. Although there are some exemplary courses, a depressing number of

trainee teachers continue to arrive in the classroom having barely heard the words e learning still less have hands on experience of it *Integration of Process Knowledge into Design Support Systems* Hubert Kals,Fred van Houten,2013-04-17
