*The Routledge Companion to Ethics, Politics and Organizations* Alison Pullen, Carl Rhodes, 2015-06-05 The Routledge Companion to Ethics Politics and Organizations synthesizes and extends existing research on ethics in organizations by explicitly focusing on ethico politics where ethics informs political action. It draws connections between ethics and politics in and around organizations and the workplace examines cutting edge areas and sets the scene for future research. Through a wealth of international and multidisciplinary contributions this volume considers the broad range of ways in which ethics and politics can be conceived and understood. The chapters look at various ethical traditions as well as the discursive deployment of ethical terminology in organizational settings and they also examine large scale political structures and processes and how they relate to different forms of politics which affect behaviour in organizations. These many possibilities are united by a focus on how ethics can be used to inform and justify the exercise of power in organizations. This collection will be a valuable reference source for students and researchers across the disciplines of organizational studies, ethics and politics.

**The Socially Just School** John Smyth, Barry Down, Peter McInerney, 2014-07-08 This book explores schools and how they can function as social institutions that advance the interests and life chances of all young people especially those who are already the most marginalized and at an educational disadvantage. Social justice is a key theme as the book examines the needs of youth, the concept of school culture, school community relations, socially critical pedagogy, curriculum and leadership and a socially critical approach to work. The Socially Just School is based upon four decades of intensive writing and researching of young lives. This work presents an alternative to the damaging school reform in which schools are made to serve the interests of the economy, education systems, the military, corporate or national interests. Readers will discover the hallmarks of socially just schools. They educationally engage young people regardless of class, race, family or neighbourhood location and they engage them around their own educational aspirations. They regard all young people as being morally entitled to a rewarding and satisfying experience of school not only those whose backgrounds happen to fit with the values of schools. They treat young people as having

strengths and being at promise rather than being at risk and with deficits or as bundles of pathologies to be remedied or fixed They are active listeners to the lives and cultures of their students and communities and they construct learning experiences that are embedded in young lives This highly readable book will appeal to students and scholars in education and sociology as well as to teachers and school administrators with an interest in social justice *Challenges in Global Learning* Paul Black,Peter Kell,Ania Lian,2016-12-14 This volume offers a wide range of approaches for framing and addressing issues which currently shape global education The discussions here are constructed around four research themes which reflect current strategic research priorities in Australian education Together they form a more rounded framework for approaching and evaluating educational changes and developments The collection is made up of collaborative research that emerged between researchers and Master s coursework students in the Department of Education at Charles Darwin University Australia The original approach this collaboration of research adopted was developed in response to the challenges currently being experienced by higher education institutions both in Australia and around the world which are now redesigning research and coursework programmes to address the quality of the services that they provide This book will appeal to educators researchers and postgraduate students **Education, Research and Perspectives** ,2005

**Reinventing the Curriculum** Mark Priestley,Gert Biesta,2013-06-20 Scotland s Curriculum for Excellence offers an example of a different approach to national curriculum development It combines what are claimed to be the best features of top down and bottom up approaches to curriculum development and provides an indication of the broad qualities that school education should promote rather than a detailed description of curriculum content Advocates of the approach argue that it provides central guidance for schools and maintains national standards whilst at the same time allowing schools and teachers the flexibility to take account of local needs when designing programmes of education Reinventing the Curriculum uses Scotland s Curriculum for Excellence as a rich case study analysing the strengths and weaknesses of this approach to curriculum design and development and exploring the implications for curriculum planning and development around the world
