The Discursive-Digital Link Ehsan Dehghan, 2025-08-22 We are in a state of crisis Democracy is under threat authoritarian politics are on the rise and digital media once heralded as emancipatory technologies are increasingly implicated in democratic erosion The Discursive Digital Link offers a critical framework for understanding the entangled relationships between discourse digital media and the hidden dynamics behind antagonism and polarisation The Discursive Digital Link presents a fluid social ontology that theorises how discourses and digital communication technologies are inseparably entangled and how this entanglement contributes to the formation of complex hierarchical relations Drawing on discourse theory and new materialist perspectives Dehghan maps how the various components of the discursive digital link users collectives identities the medium s design underlying neoliberal capitalist logics and structural power dynamics together shape antagonistic frontiers in digital spaces Through detailed case studies across multiple digital media Dehghan demonstrates how these entanglements manifest through different articulatory logics that could transform societies towards either agonistic progress or disastrous polarisation By revealing the logics of discursive digital alliances and active passivity Dehghan provides critical insights for academics activists and anyone seeking to foster progressive togetherness The Discursive Digital Link offers a powerful theoretical framework and methodology for analysing digitally mediated communication It challenges monolithic understandings of polarisation technological solutionism and symptom focused approaches instead advocating for radical structural interventions across all entangled components of the discursive digital link a necessary shift in both academic research and progressive political strategy to address the democratic crises of our time

Regulating Content on Social Media Corinne Tan, 2018-03-26 How are users influenced by social media platforms when they generate content and does this influence affect users compliance with copyright laws These are pressing questions in today s internet age and Regulating Content on Social Media answers them by analysing how the behaviours of social media users are regulated from a copyright perspective Corinne Tan an internet governance specialist compares copyright laws on selected social media platforms namely Facebook Pinterest YouTube Twitter and Wikipedia with other regulatory factors such as the terms of service and the technological features of each platform This comparison enables her to explore how each platform affects the role copyright laws play in securing compliance from their users Through a case study detailing the content generative activities undertaken by a hypothetical user named Jane Doe as well as drawing from empirical studies the book argues that in spite of copyright s purported regulation of certain behaviours users are nudged by the social media platforms themselves to behave in ways that may be inconsistent with copyright laws Praise for Regulating Content on Social Media This book makes an important contribution to the field of social media and copyright It tackles the real issue of how social media is designed to encourage users to engage in generative practices in a sense effectively seducing users into practices that involve misuse or infringement of copyright whilst simultaneously normalising such

practices Melissa de Zwart Dean of Law Adelaide Law School Australia This timely and accessible book examines the regulation of content generative activities across five popular social media platforms Facebook Pinterest YouTube Twitter and Wikipedia Its in depth critical and comparative analysis of the platforms growing efforts to align terms of service and technological features with copyright law should be of great interest to anyone studying the interplay of law and new media Peter K Yu Director of the Center for Law and Intellectual Property Texas A M University **How Contemporary**

Digital Health and Technological Promise Alan Petersen, 2018-11-21 What is digital health And what are its implications for medicine and healthcare and for individual citizens and society Digital health is of growing interest to policymakers clinicians and businesses It is underpinned by promise and optimism with predictions that digital technologies and related innovations will soon transform medicine and healthcare and enable individuals to better manage their own health and risk and to receive a more personalised treatment and care Offering a sociological perspective this book critically examines the dimensions and implications of digital health a term that is often ill defined but signifies the promise of technology to empower individuals and improve their lives as well as generating efficiencies and wealth The chapters explore relevant sociological concepts and theories changing conceptions of the self evident in citizens growing use of wearables online behaviours and patient activism changes in medical practices especially precision or personalised medicine and growing reliance on big data and algorithm driven decisions the character of the digital healthcare economy and the perils of digital health It is argued that for various reasons including the way digital technologies are designed and operate and the influence of big technology companies and other interests seeking to monetise citizens data digital health is unlikely to deliver much of what is promised Citizens use of digital technologies is likened to a Faustian bargain citizens are likely to surrender something of far greater value their personal data than what they obtain from their use However growing data activism and calls for algorithmic accountability highlight the potential for citizens to create alternative futures ones oriented to fulfilling human needs rather than techno utopian visions This ground breaking book will provide an invaluable resource for those seeking to understand the socio cultural and politico economic implications of digital health **American Reich**
