Families with Power Mary Cowhey, 2022 What if That's the question that began Families with Power. Families con Poder a grassroots organization of low income students and caregivers in Northampton MA in 2007. What if the families of students most impacted by the opportunity gap somehow had the power to organize whatever activities they felt would best help their children succeed? Mary Cowhey, a teacher who co-founded FWP, shares these stories and the voices of her fellow FWP organizers through vignettes and interviews weaving in the lessons learned along the way. Inspired by Paulo Freire's popular education and the radical tradition of the Highlander Folk School, some Latina and African mothers, a great grandmother and a couple of teachers founded Families with Power. FWP Organizing Family Reading Parties in each other's living rooms instead of meetings at school to recruit additional families and identify potential leaders. FWP created a Highlander style residential retreat that employed Freirean culture circles to pose problems and design programs to address them. Readers will get an inside look at the benefits, successes, and challenges of more than a dozen years of student and family engagement in the community and school, tackling issues from academics, race, and class to immigration and public health. **Educart**

Using Formative Assessment to Differentiate Mathematics Instruction, Grades 4-10 Leslie Laud, 2011-03-28

Seven easy steps to differentiating math instruction for busy teachers. Are you able to support your struggling students while also challenging your high achievers? Research clearly shows the value of using formative assessment to differentiate mathematics instruction, but putting it into practice can be daunting. This book makes it much easier. Staff development expert and former math teacher Leslie Laud provides a clear roadmap for using formative assessment to differentiate mathematics instruction for students in Grades 4-10 using strategies ideal for a Response to Intervention (RTI) model. She presents a comprehensive framework of research-based practices that show how to get started and establish norms. Implement formative assessment, create tiered lessons, manage a multitasking classroom effectively. Tested and enhanced by experienced math teachers, the book's strategies are designed for use in conjunction with any curriculum or textbook. Included are a wealth of practical examples, reproducibles, and student activities all developed with effective time management in mind. Whether you are just starting or interested in enhancing your mathematics instruction, this book will prove an invaluable resource. *Activities from the Mathematics Teacher* Evan M.
