Über Review:

Pharmaceutical Review ,1897 **Übersicht über die im Jahre ... auf dem Gebiete der englischen Philologie erschienenen Bücher, Schriften und Aufsätze** ,1878 Collected Works of Witold Hurewicz Witold Hurewicz,Krystyna Kuperberg,1995 This book contains papers of the outstanding and versatile mathematician Witold Hurewicz Preceding the collection are introductory articles describing Hurewicz's contributions to Borel sets dimension theory and algebraic topology Hurewicz first studied set theory and dimension and his papers on this topic are especially clear and precise making them accessible to beginning mathematicians His work in algebraic topology is marked by five fundamental papers which provide an introduction to homotopy groups and the Hurewicz Theorem concerning the relation between homotopy and singular homology These papers are included here in their original form along with English translations Each paper in the collection is followed by a review from one of the major reviewing journals These reviews were written by eminent mathematicians and serve as excellent abstracts for the papers Transportation Analytics in the Era of Big Data Satish V. Ukkusuri,Chao Yang,2018-07-28 This book presents papers based on the presentations and discussions at the international workshop on Big Data Smart Transportation Analytics held July 16 and 17 2016 at Tongji University in Shanghai and chaired by Professors Ukkusuri and Yang The book is intended to explore a multidisciplinary perspective to big data science in urban transportation motivated by three critical observations The rapid advances in the observability of assets platforms for matching supply and demand thereby allowing sharing networks previously unimaginable The nearly universal agreement that data from multiple sources such as cell phones social media taxis and transit systems can allow an understanding of infrastructure systems that is critically important to both quality of life and successful economic competition at the global national regional and local levels There is presently a lack of unifying principles and methodologies that approach big data urban systems The workshop brought together varied perspectives from engineering computational scientists state and central government social scientists physicists and network science experts to develop a unifying set of research challenges and methodologies that are likely to impact infrastructure systems with a particular focus on transportation issues The book deals with the emerging topic of data science for cities a central topic in the last five years that is expected to become critical in academia industry and the government in the future There is currently limited literature for researchers to know the opportunities and state of the art in this emerging area so this book fills a gap by synthesizing the state of the art from various scholars and help identify new research directions for further study Andrzej Mostowski and Foundational Studies A. Ehrenfeucht,Andrzej Ehrenfeucht,V.W. Marek,M. Srebrny,2008-03-06 Andrzej Mostowski was one of the leading 20th century logicians This volume examines his legacy devoted both to his scientific heritage and to the memory of him as a great researcher teacher organizer of science and person It includes the bibliography of Mostowski's writings "The Philosophical Review ,1894 Medical Review of Reviews ,1914 Index medicus in v 1 30 1895 1924 **Smart Urban**

Mobility Michèle Finck, Matthias Lampert, Valentina Moscon, Heiko Richter, 2020-09-28 This book adds a critical perspective to the legal dialogue on the regulation of smart urban mobility. Mobility is one of the most visible sub domains of the smart city which has become shorthand for technological advances that influence how cities are structured. Public services are fashioned and citizens coexist. In the urban context mobility has come under pressure due to a variety of different forces such as the implementation of new business models e.g. car and bicycle sharing, the proliferation of alternative methods of transportation e.g. electric scooters, the emergence of new market players and stakeholders e.g. internet and information technology companies and advancements in computer science in particular due to artificial intelligence. At the same time demographic changes and the climate crisis increase innovation pressure. In this context law is a seminal factor that both shapes and is shaped by socio economic and technological change. This book puts a spotlight on recent developments in smart urban mobility from a legal regulatory and policy perspective. It considers the implications for the public sector, businesses and citizens in relation to various areas of public and private law in the European Union including competition law, intellectual property law, contract law, data protection law, environmental law, public procurement law and legal philosophy.
