**Possibilities of Generative AI** Gonçalo Perdigão ,Filipa Matos Baptista ,João Santos Pereira, This groundbreaking work explores the dynamic intersection of artificial intelligence creativity and innovation unveiling how Generative AI whether in personal projects or large scale enterprises can be designed to collaborate and enhance human ingenuity It is written for C level executives leaders marketers and creative and curious minds With over two decades of experience Gonçalo Perdigão Filipa Matos Baptista MBA PhD and João Santos Pereira PhD spanning corporate leadership start ups and academic research bring together actionable insights cutting edge developments and lessons shared on the community These diverse perspectives and hands on approaches give unique insights into how generative AI reshapes the future of organizations Building Creative Machines community <https://www.buildingcreativemachines.com> offers 100 articles 200 open source sketches Exclusive interviews with leaders from Anthropic Amazon Harvard Google TikTok and more Building Creative Machines is a comprehensive guide for anyone eager to navigate the future of Generative AI driven creativity and unlock its transformative potential

**Build a Text-to-Image Generator (from Scratch)** Mark Liu, 2026-01-13 This book takes you step by step through creating your own AI models that can generate images from text You'll explore two methods of image generation vision transformers and diffusion models and learn vital AI development techniques as you go Dive into the powerful models behind AI image generators The best way to learn is to build something from scratch and in this book you'll build your very own diffusion model and vision transformer As you work through each stage of development you'll develop an understanding of how these models can be customized applied and integrated for impressive multimodal AI Build a Text to Image Generator from Scratch teaches you how to Build and train models to generate high resolution images based on text descriptions Edit an existing image based on text prompts Build and train a model to add captions to images Build and train a vision transformer to classify images Fine tune LLMs for downstream tasks such as classification text or image generation Better differentiate real images from deepfakes About the technology AI generated images appear everywhere from high end advertising to casual social media feeds Text to image tools like Dall e Midjourney and Flux make it easy to create AI art but how do they work In this book you'll find out by building your own text to image generator About the book Build a Text to

Image Generator from Scratch explores both transformer based image generation and diffusion models You ll work hands on to build a pair of simple generation models that can classify images automatically add captions reconstruct images and enhance existing graphics Author Mark Liu guides you every step of the way with clear explanations informative diagrams and eye opening examples you can build on your own laptop What s inside Build a vision transformer to classify images Edit images using text prompts Fine tune image models About the reader Requires basic knowledge of generative AI models and intermediate Python skills About the author Mark Liu is the founding director of the Master of Science in Finance program at the University of Kentucky He is also the author of Learn Generative AI with PyTorch Table of Contents Part 1 1 A tale of two models Transformers and diffusions 2 Build a transformer 3 Classify images with a vision transformer 4 Add captions to images Part 2 5 Generate images with diffusion models 6 Control what images to generate in diffusion models 7 Generate high resolution images with diffusion models Part 3 8 CLIP A model to measure the similarity between image and text 9 Text to image generation with latent diffusion 10 A deep dive into Stable Diffusion Part 4 11 VQGAN Convert images into sequences of integers 12 A minimal implementation of DALL E Part 5 13 New developments and challenges in text to image generation A Installing PyTorch and enabling GPU training locally and in Colab *Cybernetics and the Constructed Environment* Zihao Zhang,2024-07-25 Grounded in contemporary landscape architecture theory and practice Cybernetics and the Constructed Environment blends examples from art design and engineering with concepts from cybernetics and posthumanism offering a transdisciplinary examination of the ramifications of cybernetics on the constructed environment Cybernetics or the study of communication and control in animals and machines has grown increasingly relevant nearly 80 years after its inception Cyber physical systems sensing networks and spatial computing algorithms and intelligent machines create endless feedback loops with human and non human actors co producing a cybernetic environment Yet when an ecosystem is meticulously managed by intelligent machines can we still call it wild nature Posthumanism ideas such as new materialism actor network theory and object oriented ontology have become increasingly popular among design disciplines including landscape architecture and may have provided transformative frameworks to understand this entangled reality However design still entails a sense of intentionality and an urge to control How do we then address the tension between the designer s intentionality and the co produced reality of more than human agents in the cybernetic environment Is posthumanism enough to develop a framework to think beyond our all too human ways of thinking For researchers scholars practitioners and students in environmental design and engineering disciplines this book maps out a paradigm of environmentalism and ecological design rooted in non communication and uncontrollability and puts a speculative turn on cybernetics Chapters 8 and 9 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license *Agentic AI For Dummies* Pam Baker,2026-01-27 An easy to follow guide to demystifying Agentic AI the next step in the evolution of artificial

intelligence Agentic AI is the next big leap in artificial intelligence Agentic systems don't just respond to commands They set goals make decisions and take initiative without direct human interaction Sound like a lot to wrap your head around Fortunately Agentic AI For Dummies is here to help you gain understanding of this advancing technology Written by the author of ChatGPT For Dummies and Generative AI For Dummies this easy to understand tech guide helps you take your first steps into Agentic AI Get insight into the technologies driving Agentic AI a road map for shifting from legacy systems to Agentic systems and a tour of real world use cases for Agentic AI This book arms you with an understanding to make better decisions about how and when to use Agentic AI technologies Inside the book Discussions of the technological foundations of agentic AI Explorations of the wide variety of applications of the AI agents including in scientific research innovation business operations healthcare and more Insightful examinations of the ethical considerations and hurdles you'll need to navigate when it's time to deploy agentic AI in your company Perfect for business owners entrepreneurs managers executives professionals and team leaders in the private sector Agentic AI For Dummies is a hands on toolkit and strategy guide for using autonomous AI solutions to solve hard problems in your organization

System Innovation for an Artificial Intelligence Era Artde Donald Kin-Tak Lam, Stephen D. Prior, Siu-Tsen Shen, Sheng-Joue Young, Liang-Wen Ji, 2024-11-05

System Innovation for an Artificial Intelligence Era Applied System Innovation X contains the papers presented at the IEEE 10th International Conference on Applied System Innovation ICASI 2024 Kyoto Japan 17-21 April 2024 Of the more than 600 submitted papers from 12 different countries after review approximately a quarter was accepted for publication The book aims to provide an integrated communication platform for researchers from a wide range of topics including information technology communication science applied mathematics computer science advanced material science and engineering System Innovation for an Artificial Intelligence Era Applied System Innovation X enhances interdisciplinary collaborations between science and engineering and is aimed at academics and technologists interested in the above mentioned areas

**Deep Learning in Banking** Cristian Bravo, Sebastian Maldonado, Maria Oskarsdottir, 2026-01-15 Unlock the potential of artificial intelligence to transform financial services for a new era Deep Learning in Banking Leveraging Artificial Intelligence for Next Generation Financial Services by Cristian Bravo Sebastian Maldonado and Maria Oskarsdottir is a compelling resource that highlights the critical intersection of AI and banking It offers actionable insights and practical solutions for leveraging deep learning in lending institutions With increasing regulatory challenges and the need for sophisticated models this book provides essential strategies to navigate the evolving landscape of financial services Structured for both academic and professional use Deep Learning in Banking delivers a comprehensive examination of the methodological frameworks of AI applications in lending You'll learn to combine images text time series graphs and structured data to develop multimodal deep learning and large scale models and how they relate to explainability and fairness with practical examples and real world case studies that ensure effective implementation Inside the book Learn how

to develop AI models within the modern regulatory environment Explore multimodal data to develop deep learning models for financial institutions Discover case studies highlighting the application of advanced machine learning techniques in banking Deep Learning in Banking is written for academics financiers banking professionals and data scientists eager to revolutionize their approach to financial services The book empowers its readers with the knowledge and tools needed to harness AI s full potential paving the way for innovative and compliant solutions in the banking industry The Rise of Generative AI. Applications, Challenges, and Ethical Implications Fatlind Mazreku, 2025-12-10 Scientific Study from the year 2025 in the subject Computer Sciences Artificial Intelligence language English abstract Generative Artificial Intelligence AI refers to algorithms and models capable of producing new content such as text images music or code that mimics or even rivals human creations Recent breakthroughs in model architectures e g transformers and the advent of large scale models like OpenAI s GPT 3 and DALL E have fueled an explosive growth in generative AI s capabilities and public adoption This paper provides an overview of generative AI s rise and its transformative impact across various fields We discuss key applications of generative AI in domains ranging from art and design to software development and medicine highlighting the innovative benefits it brings such as enhanced creative productivity and new problem solving tools At the same time we examine the challenges and ethical concerns emerging from generative AI s widespread use issues of bias misinformation intellectual property and misuse that have become increasingly urgent We also analyze the current technical limitations of generative AI including accuracy interpretability and resource demands and consider future outlooks for the technology The findings underscore that while generative AI offers unprecedented opportunities and innovations careful consideration of its ethical implications and proactive governance is essential to ensure it is developed and used responsibly In conclusion generative AI stands as a powerful tool that is reshaping creativity industry and society and its continued evolution will depend on balancing its benefits with diligent management of its risks *Power Girl Vol. 3: The Star* Leah
