**Mathematics in Berlin** Heinrich Begehr,Helmut Koch,Jürg Kramer,Norbert Schappacher,Ernst-Jochen Thiele,1998-07-21 This little book is conceived as a service to mathematicians attending the 1998 International Congress of Mathematicians in Berlin It presents a comprehensive condensed overview of mathematical activity in Berlin from Leibniz almost to the present day without however including biographies of living mathematicians Since many towering figures in mathematical history worked in Berlin most of the chapters of this book are concise biographies These are held together by a few survey articles presenting the overall development of entire periods of scientific life at Berlin Overlaps between various chapters and differences in style between the chapters were inevitable but sometimes this provided opportunities to show different aspects of a single historical event for instance the Kronecker Weierstrass controversy The book aims at readability rather than scholarly completeness There are no footnotes only references to the

individual bibliographies of each chapter Still we do hope that the texts brought together here and written by the various authors for this volume constitute a solid introduction to the history of Berlin mathematics     *Resources in Education* ,1992-03     *Transactions of the Royal Institution of Naval Architects* Royal Institution of Naval Architects,2004 List of members in each volume     **Proceedings** ,2005     Logistics Software ,1991     **The Motor Ship** ,1997     **Chemical Engineering Software Guide** CAE Consultants, Inc,1984     *Government Reports Announcements & Index* ,1996
