

Narrative analysis and research

Narrative research is part of human sciences and describes the process of collecting and analyzing stories people are telling about their experiences. Moreover, this qualitative analysis helps to interpret the collected narrative data. There are several research methods to be considered and narrative methods are one of the most challenging because there is a wide scope for interpretation. In other words the narrative approaches rely on the written or spoken words or visual representation of individuals. Narrative inquiry observes what and how something is said. Narrative research can be both - a research method and an object of research. Narrative methods can be considered "real world measures" to investigate real life problems. In simple terms the narrative approach encompasses the life story of a person and the meaning of that person's experiences. In most cases, an aggregate of narratives is created that influence each other.

researchers can uncover such issues as social change causality and social identity. She also shows how the techniques and skills used by qualitative researchers can be deployed when doing quantitative research and similarly how qualitative researchers can sometimes profit from using quantitative skills and techniques. This book provides both a fascinating and a challenging read. What sets this text apart from other books on research methodology and methods is that it does not focus exclusively on either quantitative or qualitative research approaches but rather attempts to bridge the divide. The book should be compulsory reading not only for those aspiring to undertake narrative research and those students undertaking higher degree research courses but also for those more experienced researchers wishing to explore contemporary issues in research methods and methodology. As a recent recruit to a lecturer practitioner post with little recent experience in the subject area covered by this book, I found it met my needs very well. I would certainly recommend this book for purchase.
