Applications, Challenges, and Ethical Implications Fatlind Mazreku,2025-12-10 Scientific Study from the year 2025 in the subject Computer Sciences Artificial Intelligence language English abstract Generative Artificial Intelligence AI refers to algorithms and models capable of producing new content such as text images music or code that mimics or even rivals human creations Recent breakthroughs in model architectures e g transformers and the advent of large scale models like OpenAI s GPT 3 and DALL E have fueled an explosive growth in generative AI s capabilities and public adoption This paper provides an overview of generative AI s rise and its transformative impact across various fields We discuss key applications of generative AI in domains ranging from art and design to software development and medicine highlighting the innovative benefits it brings such as enhanced creative productivity and new problem solving tools At the same time we examine the challenges and ethical concerns emerging from generative AI s widespread use issues of bias misinformation intellectual property and misuse that have become increasingly urgent We also analyze the current technical limitations of generative AI including accuracy interpretability and resource demands and consider future outlooks for the technology The findings underscore that while generative AI offers unprecedented opportunities and innovations careful consideration of its ethical implications and proactive governance is essential to ensure it is developed and used responsibly In conclusion generative AI stands as a powerful tool that is reshaping creativity industry and society and its continued evolution will depend on balancing its benefits with diligent management of its risks **Reverse Acronyms, Initialisms, & Abbreviations**

Dictionary ,2007 **The Artificial Intelligence Compendium** ,1988 **The Electrical Review** ,1884 *Build a Text-to-Image Generator (from Scratch)* Mark Liu,2026-01-13 This book takes you step by step through creating your own AI models that can generate images from text You ll explore two methods of image generation vision transformers and diffusion models and learn vital AI development techniques as you go Dive into the powerful models behind AI image generators The

best way to learn is to build something from scratch and in this book you'll build your very own diffusion model and vision transformer. As you work through each stage of development you'll develop an understanding of how these models can be customized, applied and integrated for impressive multimodal AI. *Build a Text to Image Generator from Scratch* teaches you how to build and train models to generate high resolution images based on text descriptions, edit an existing image based on text prompts, build and train a model to add captions to images, build and train a vision transformer to classify images, fine tune LLMs for downstream tasks such as classification, text or image generation, better differentiate real images from deepfakes. About the technology AI generated images appear everywhere from high end advertising to casual social media feeds. Text to image tools like Dall-e, Midjourney and Flux make it easy to create AI art, but how do they work? In this book you'll find out by building your own text to image generator. About the book *Build a Text to Image Generator from Scratch* explores both transformer based image generation and diffusion models. You'll work hands on to build a pair of simple generation models that can classify images automatically, add captions, reconstruct images and enhance existing graphics. Author Mark Liu guides you every step of the way with clear explanations, informative diagrams and eye opening examples you can build on your own laptop. What's inside *Build a vision transformer to classify images*: Edit images using text prompts, fine tune image models. About the reader: Requires basic knowledge of generative AI models and intermediate Python skills. About the author: Mark Liu is the founding director of the Master of Science in Finance program at the University of Kentucky. He is also the author of *Learn Generative AI with PyTorch*. Table of Contents: Part 1: A tale of two models. Transformers and diffusions. Part 2: Build a transformer. Part 3: Classify images with a vision transformer. Part 4: Add captions to images. Part 5: Generate images with diffusion models. Part 6: Control what images to generate in diffusion models. Part 7: Generate high resolution images with diffusion models. Part 8: CLIP: A model to measure the similarity between image and text. Part 9: Text to image generation with latent diffusion. Part 10: A deep dive into Stable Diffusion. Part 11: VQGAN: Convert images into sequences of integers. Part 12: A minimal implementation of DALL-E. Part 13: New developments and challenges in text to image generation. A.
