Inteligencia artificial: la revolución que cambiará todo Álvaro Montes, 2024-06-24 Es imposible evitar la IA pero es perfectamente posible utilizarla para el bien lvaro Montes El término inteligencia artificial IA fue acuñado por un grupo de científicos e investigadores en 1956

pero durante sesenta y siete años llamó muy poco la atención de la sociedad general. En 2023 esto cambió de manera repentina gracias al auge de las redes neuronales como el famoso ChatGPT y desde entonces el tema está en boca del mundo entero. La Cuarta Revolución Industrial ya está aquí y va a cambiar el panorama actual a una velocidad inimaginable. Los tecnooptimistas creen que esto va a ser bueno para la humanidad, los tecnoapocalípticos no dejan de vaticinar que la IA va a destruirnos dentro de muy poco. Quién tiene la razón? Ivano Montes, un periodista con treinta años de carrera especializado en información de tecnología y director desde hace dos de Inteligencia Artificial Colombia en PRISA Media, cuenta en este libro todo lo que se necesita saber sobre este tema de actualidad para no quedarse a la zaga de esta revolución que afectará a todos. Es una obra que presenta el panorama general de la IA, habla de robótica y automatización y aterriza a lo que se está haciendo al respecto en Colombia. El sector financiero y el de salud son los que más la utilizan y Latinoamérica. Además, revela la complejidad que supondrá la transición a estas nuevas tecnologías porque, como explica en estas páginas, no es lo mismo llenar de robots el puerto de Hamburgo en Alemania que hacer lo propio en el de Buenaventura. Lo cierto del caso es que esta revolución de la IA ya comenzó y va a cambiarlo todo.

Discussing the effects of digitalization on schools in Germany Fabian Berger, 2025-03-05 Seminar paper from the year 2025 in the subject Computer Sciences Artificial Intelligence grade 1.3 University of Flensburg Institute of Educational Sciences course School and Society II language English abstract What exactly is ChatGPT and why will it have a significant impact on learning in German schools? How does it influence the process of digitalization in schools? When Sam Altman, CEO of OpenAI, announced the release of ChatGPT on November 30, 2022, on X (formerly Twitter) only a few anticipated its far-reaching societal impact. Altman invited users to try out ChatGPT. The result was that within just five days the platform reached one million users and two months later that number had climbed to 100 million. The user base continues to grow rapidly, making ChatGPT the fastest growing application of our time. While some celebrate the possibilities of this technology and are fascinated by its potential, others view its development with concern. They wonder how to tame this genie, fearing that the technology might cause more harm than good. Soon a broad societal debate began about the opportunities and limitations of this form of artificial intelligence. No other topic has garnered as much attention or research activity in recent months. Accordingly, these debates have also resonated in the field of education.
