**Human-Computer Interaction** Constantine Stephanidis, Gavriel Salvendy, 2024-09-28. The pervasive influence of technology continuously shapes our daily lives. From smartphones to smart homes, technology is revolutionizing the way we live, work, and interact with each other. Human computer interaction (HCI) is a multidisciplinary research field focusing on the study of people interacting with information technology and plays a critical role in the development of computing systems that work well for the people using them, ensuring the seamless integration of interactive systems into our technologically driven lifestyles. The book series contains six volumes providing extensive coverage of the field wherein each one addresses different theoretical and practical aspects of the HCI discipline. Readers will discover a wealth of information encompassing the foundational elements, state of the art review in established and emerging domains, analysis of contemporary advancements brought about by the evolution of interactive technologies and artificial intelligence, as well as the emergence of diverse societal needs and application domains. These books showcase the pivotal role of HCI in designing interactive applications across a diverse array of domains. Explore the dynamic relationship between humans and intelligent environments with a specific emphasis on the role of Artificial Intelligence (AI) and the Internet of Things (IoT). Provide an extensive exploration of interaction design by examining a wide range of technologies, interaction techniques, styles, and devices. Discuss user experience methods and tools for the design of user-friendly products and services. Bridge the gap between software engineering and human computer interaction practices for usability, inclusion, and sustainability. These volumes are an essential read for individuals interested in human computer interaction research and applications.

Producing Women Michele White, 2015-03-02. Producing Women examines the ways femininity is produced through new media. Michele White considers how women are constructed, produce themselves as subjects, form vital production cultures on sites like Etsy, and deploy technological processes to reshape their identities and digital characteristics. She studies the means through which women market traditional female roles, are viewed and produce, and restructure their gendered, raced, eroticized, and sexual identities. Incorporating a range of examples across numerous forms of media, including trash, the dress, wedding photography, Internet, how-to instructions, about zombie walk, brides, nail polish, blogging, DIY, crafting, and reborn doll production, Producing Women elucidates women's production cultures online and the ways that individuals can critically study and engage with these practices.
