**Uwe Mönks**

### **Pdf Online Integrated Uncertainty Knowledge Modelling Decision:**

*Uncertainty Theory* Baoding Liu, 2014-11-03 When no samples are available to estimate a probability distribution we have to invite some domain experts to evaluate the belief degree that each event will happen Perhaps some people think that the belief degree should be modeled by subjective probability or fuzzy set theory However it is usually inappropriate because both of them may lead to counterintuitive results in this case In order to rationally deal with belief degrees uncertainty theory was founded in 2007 and subsequently studied by many researchers Nowadays uncertainty theory has become a branch of axiomatic mathematics for modeling belief degrees This is an introductory textbook on uncertainty theory uncertain programming uncertain statistics uncertain risk analysis uncertain reliability analysis uncertain set uncertain logic uncertain inference uncertain process uncertain calculus and uncertain differential equation This textbook also shows applications of uncertainty theory to scheduling logistics networks data mining control and finance

**Information Fusion Under Consideration of Conflicting Input Signals** Uwe Mönks, 2016-11-25 This work proposes the multilayered information fusion system MACRO multilayer attribute based conflict reducing observation and the BalTLCS fuzzified balanced two layer conflict solving fusion algorithm to reduce the impact of conflicts on the fusion result In addition a sensor defect detection method which is based on the continuous monitoring of sensor reliabilities is presented The performances of the contributions are shown by their evaluation in the scope of both a publicly available data set and a machine condition monitoring application under laboratory conditions Here the MACRO system yields the best results compared to state of the art fusion mechanisms

**Fuzzy Logic in Smart Sustainable Cities** Bhupinder Singh, Christian Kaunert, Komal Vig, 2025-06-04 This book focuses on fuzzy logic a paradigm shifting approach that challenges the binary simplicity of traditional logic systems The concept of fuzzy logics is a powerful tool capable of handling imprecise information and accommodating the vagaries of real world scenarios This marks the beginning of a journey that explores how fuzzy logics can bridge gaps and fills voids in our current strategies for achieving sustainable development goals relating to sustainable cities With regard to issues such as water scarcity energy affordability and urban sustainability the traditional linear approaches often fall short in capturing their complex dynamic and uncertain nature Fuzzy logics with their ability to handle imprecise information and uncertainties emerge as a promising tool for navigating the intricate web of variables that influence the attainment of these sustainable development goals This book bridges the gap between conventional disciplines such as engineering environmental science and urban planning by incorporating fuzzy logic ideas into talks on sustainable cities and offers insights into resource allocation strategies that will successfully lead to the intended sustainability goals by using models based on fuzzy logic It also examines how fuzzy logic adjusts to changing circumstances so that suggested fixes are still applicable in the long run

**Mathematical Finance with Applications** Wing-Keung Wong, Xu Guo, Sergio Ortobelli Lozza, 2020-12-07 Mathematical finance plays a vital role in many fields within finance and provides the theories and tools

that have been widely used in all areas of finance Knowledge of mathematics probability and statistics is essential to develop finance theories and test their validity through the analysis of empirical real world data For example mathematics probability and statistics could help to develop pricing models for financial assets such as equities bonds currencies and derivative securities

**Artificial Intelligence, Blockchain, Computing and Security Volume 1** Arvind Dagur,Karan Singh,Pawan Singh Mehra,Dhirendra Kumar Shukla,2023-12-01 This book contains the conference proceedings of ICABCS 2023 a non profit conference with the objective to provide a platform that allows academicians researchers scholars and students from various institutions universities and industries in India and abroad to exchange their research and innovative ideas in the field of Artificial Intelligence Blockchain Computing and Security It explores the recent advancement in field of Artificial Intelligence Blockchain Communication and Security in this digital era for novice to profound knowledge about cutting edges in artificial intelligence financial secure transaction monitoring real time assistance and security for advanced stage learners researchers academicians The key features of this book are Broad knowledge and research trends in artificial intelligence and blockchain with security and their role in smart living assistance Depiction of system model and architecture for clear picture of AI in real life Discussion on the role of Artificial Intelligence and Blockchain in various real life problems across sectors including banking healthcare navigation communication security Explanation of the challenges and opportunities in AI and Blockchain based healthcare education banking and related industries This book will be of great interest to researchers academicians undergraduate students postgraduate students research scholars industry professionals technologists and entrepreneurs
