### General Safety Information

Air compressors are utilized in a variety of air system applications. Because these air compressors and other components (compressed gases, spray guns, nozzles, hoses, fittings, etc.) can create up to high pressures (shocking systems), the following safety precautions should be observed at all times:

1. Read the instruction manual for each component carefully before attempting to assemble, disassemble or operate your particular system.
2. Do not exceed the pressure rating of any component in the system.
3. Protect material lines and air lines from damage or punctures.
4. Never point a spray gun at yourself or any other person. Accidental discharge may result in serious injury.
5. Check hoses for weak or worn condition before each use, making certain that all connections are secure.
6. Release all pressures within the system before attempting to service any component.
7. Follow all local electrical and safety codes, as well as the National Electrical Code (NEC) and the Occupational Safety and Health Act (OSHA).
8. On engine driven units, check engine oil and fuel levels before starting. **DO NOT ADD GASOLINE TO A HOT ENGINE!**
9. Electric motors must be securely and adequately grounded. This can be accomplished by

wiring with a grounded, metal-clad flexible supply cord, by using a three-prong grounded plug connected to the three wires (one on the motor frame, one other) or the three wires off the motor frame, or other suitable means.

10. Always disconnect power source before working with or near a motor or its connected load. If this power disconnect cannot be easily broken, place it on the input or off position and tag it to prevent unauthorized reconnection of power.
11. All moving parts should be guarded.
12. Be careful when touching the exterior of an operating motor or pump — it may be hot enough to be painful or cause injury. When motors and pumps are connected to electrical power at rated heat and voltage — insulation materials are built to operate at higher temperatures.
13. Protect the power cable from coming in contact with sharp objects.
14. Do not kink power cable and never allow the cable to come in contact with oil, grease, hot surfaces, or chemicals.
15. Make certain that the power source conforms to the requirements of your equipment.
16. Wiping or cleaning rags and other flammable materials must be placed in a tightly closed metal container and disposed of later in the proper fashion.
