From the beginning of civilization important structures and monuments have been built from or based on natural stone. Until the end of the nineteenth century the use of local stone resources was mostly in balance with the local environment. Strict environmental legislation has resulted in the closing of many long standing quarries in industrialized countries which has led to a shortage of traditional stone varieties. This has caused problems for restoration practice. Cheap imported stone from less industrialized countries has become more widely available in recent

years Some of the issues related to built stone conservation and restoration covered by this volume are the establishment of inventories of possible replacement stones understanding the decay mechanism and use of preventive conservation methods for slowing down decay processes evaluation of the properties of natural stone and assessing the risks of using replacement stones of different qualities    Guidelines for Reporting Health Research David Moher,Douglas Altman,Kenneth Schulz,Iveta Simera,Elizabeth Wager,2014-08-06 Guidelines for Reporting Health Research is a practical guide to choosing and correctly applying the appropriate guidelines when reporting health research to ensure clear transparent and useful reports This new title begins with an introduction to reporting guidelines and an overview of the importance of transparent reporting the characteristics of good guidelines and how to use reporting guidelines effectively in reporting health research This hands on manual also describes over a dozen internationally recognised published guidelines such as CONSORT STROBE PRISMA and STARD in a clear and easy to understand format It aims to help researchers choose and use the correct guidelines for reporting their research and to produce more completely and transparently reported papers which will help to ensure reports are more useful and are not misleading Written by the authors of health research reporting guidelines in association with the EQUATOR Enhancing the QUAlity and Transparency Of health Research Network Guidelines for Reporting Health Research is a helpful guide to producing publishable research It will be a valuable resource for researchers in their role as authors and also an important reference for editors and peer reviewers    **Rehabilitation Research and Demonstration Projects, 1955-1970** Neil S.
