**Promoting the Educational Success of Children and Youth Learning English** National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Division of Behavioral and Social Sciences and Education, Board on Science Education, Board on Children, Youth, and Families, Committee on Fostering School Success for English Learners: Toward New Directions in Policy, Practice, and Research, 2017-09-25 Educating dual language learners DLLs and English learners ELs effectively is a national challenge with consequences both for individuals and for American society. Despite their linguistic, cognitive, and social potential, many ELs who account for more than 9 percent of enrollment in grades K-12 in U.S. schools are struggling to meet the requirements for academic success and their prospects for success in postsecondary education and in the workforce are jeopardized as a result. *Promoting the Educational Success of Children and Youth Learning English: Promising Futures* examines how evidence based on research relevant to the development of DLLs/ELs from birth to age 21 can inform education and health policies and related practices that can result in better educational outcomes. This report makes recommendations for policy, practice, and research and data collection focused on addressing the challenges in caring for and educating DLLs/ELs from birth to grade 12.

*The Oxford Handbook of Assessment Policy and Practice in Music Education, Volume 2* Timothy Brophy, 2019-01-02 In the music classroom, instructors who hope to receive aid are required to provide data on their classroom programs. Due to the lack of reliable, valid, large scale assessments of student achievement in music, however, music educators in schools that accept funds face a considerable challenge in finding a way to measure student learning in their classrooms. From Australia to Taiwan to the Netherlands, music teachers experience similar struggles in the quest for a definitive assessment resource that can be used by both music educators and researchers. In this two volume Handbook, contributors from across the globe come together to provide an authority on the assessment, measurement, and evaluation of student learning in music. The Handbook's first volume emphasizes international and theoretical perspectives on music education assessment in the major world regions. This volume also looks at technical aspects of measurement in music and outlines situations where theoretical foundations can be applied to the development of tests in music. The Handbook's second volume offers a series of practical and U.S. focused approaches to music education assessment. Chapters address assessment in different types of U.S. classrooms, how to assess specific skills or requirements, and how assessment can be used in tertiary and music teacher education classrooms. Together, both volumes of *The Oxford Handbook of Assessment in Music Education* pave the way forward for music educators and researchers in the field.

Derek A. Neal, 2018-05-14 Derek Neal writes that economists must analyze public education policy in the same way they analyze other procurement problems. He shows how standard tools from economics research speak directly to issues in education. For mastering the models and tools that economists of education should use in their work there is no better resource available.

**The Perfect Assessment System** Richard J. Stiggins, 2017-03-24 It's time to move our assessment practices from the 1950s to the century we're living in. It's time to invest in our teachers and local school leaders instead of in more tests. It's time to help all students understand how to unleash their strengths and gain a sense of themselves as learners capable of choosing their own paths to success. In *The Perfect Assessment System*, Rick Stiggins calls for the ground-up redevelopment of assessment in U.S. education. Speaking from more than 40 years of experience in the field and speaking for all learners who hope to succeed, the teachers who want them to succeed, and the local school leaders whose aspirations for success have been thwarted by assessment traditions, Stiggins maps out the adjustments in practice and culture necessary to generate both accurate accountability data and the specific evidence of individual mastery that will support sound instructional decision making and better learning in the classroom. He addresses Assessment purpose, how and why to clarify the reason for every assessment and the users it will serve; Learning targets to be assessed; how to make sure we focus on the right competencies and set consistent definitions of success; Assessment quality; how to ensure every assessment at every level is an excellent one; Communication of assessment results; how to share information in ways that best support diverse purposes; Assessment impact; how to link assessment to truly productive universal student motivation. We have not yet begun to explore assessment's true potential to enhance both school quality and student well-being. Stiggins kicks off this critical conversation and charts a course for a new system that promises much higher levels of student success at a fraction of our current testing costs. The door is open for assessment reform; here is a bold plan for getting it right.
