Retailing is indeed in transition. Interestingly, this means not a global decline, but a shift in retailing's center of gravity from the United States and Europe to Asia, and from apparel manufacturers to apparel retailers. While the former represents the "old world," the latter is the "new world." The new world represents an opportunity for global manufacturers to expand overseas, and for the retail world to flourish with new and improved distribution and supply-chain models.

Over the last decade manufacturers have pursued a low-cost strategy using low-wage governments, and some have taken advantage of the low-cost labor force to manufacture in globalized play. In 2008, Wal-Mart Stores Inc. — the largest retailer in the world — filed a complaint, without its congressional and Senate subcommittee leaders (Sen. John Thune [R-S.D.] and Sen. ### **Smart**

**Working** Anne Marie McEwan, 2016-04-01 It is more possible than ever to influence and shape our working environments, our experience of work and each other. Business leaders who set the conditions and create engaging, meaningful work through organisational design and use of the knowledge and creative potential of their workforces are engaging in smart working. In *Smart Working: Creating the Next Wave*, Anne Marie McEwan explains how smart working is more than just flexible and mobile working. It is about flexibility and autonomy, how people work, not just where and when. She argues that systems working environments and governance are more likely to lead to effective performance if they maximise self-determination and choice. She describes how collaborative communication technologies create possibilities for stimulating and harnessing collective intelligence within and beyond organisational boundaries. In short, smart working is an outcome of designing organisational systems that are good both for business and people. McEwan warns that the tendency to talk about new management paradigms risks overlooking insights derived from years of academic research and particularly from lessons learned from process innovation methodology. This rigorously researched but intensely practical book examines current workplace trends relating to people, technology, place and space. It reviews what we already know about effective management and high performance work methods and shows how those insights can be used to advantage in contemporary workscapes. It will help those with responsibilities for the strategic direction of their organisations. Learning and development and HR professionals will understand how to interpret these insights for their own business.
