**Applications** Kohei Arai, Supriya Kapoor, Rahul Bhatia, 2018-11-07 Gathering the Proceedings of the 2018 Intelligent Systems Conference IntelliSys 2018, this book offers a remarkable collection of chapters covering a wide range of topics in intelligent systems and computing and their real world applications. The Conference attracted a total of 568 submissions from pioneering researchers, scientists, industrial engineers and students from all around the world. These submissions underwent a double blind peer review process after which 194 including 13 poster papers were selected to be included in these proceedings. As intelligent systems continue to replace and sometimes outperform human intelligence in decision making processes, they have made it possible to tackle many problems more effectively. This branching out of computational intelligence in several directions and the use of intelligent systems in everyday applications have created the need for such an international conference which serves as a venue for reporting on cutting edge innovations and developments. This book collects both theory and application based chapters on all aspects of artificial intelligence from classical to intelligent scope. Readers are sure to find the book both interesting and valuable as it presents state of the art intelligent methods and techniques for solving real world problems along with a vision of future research directions. *Zuverlässige drahtlose Übertragung in maritimen Umgebungen unter Berücksichtigung komplexer metallischer Strukturen* Helge Fielitz, 2016-03-01

Auf Fracht und Passagierschiffen ist heutzutage die drahtlose Übertragung von Navigations und Telekommunikationsdaten nicht mehr wegzudenken. Eine neue Anwendung für die Nutzung von maritimen Funkverbindungen ist der Aufbau einer schnellen Datenverbindung zwischen Schiffen und Landstationen während der Revierfahrt und in Hafengebieten. Die dort herrschenden komplexen elektromagnetischen Ausbreitungsbedingungen verhindern eine zuverlässige Datenübertragung mit konventionellen Systemen. In dieser Arbeit wird unter anderem die komplexe Mehrwegeausbreitung untersucht und vermessen. Basierend auf diesen Ergebnissen werden adaptive Antennensysteme simuliert, aufgebaut und getestet, um in diesen Umgebungen eine zuverlässige drahtlose Datenübertragung zu realisieren. The operation of today's cargo and passenger vessels without the assistance of wireless navigation and communication is unthinkable. The establishment of short range wireless links with high data rates between ship and shore is a new application for maritime wireless systems. The complex electromagnetic surrounding in these areas prevents the use of conventional wireless data transmissions systems. In this work the complex multipath propagation is investigated and measured. Based on the measurement results adaptive antenna systems are simulated, constructed and tested in order to guarantee reliable wireless data transfer in these areas.
