

Positive Parenting

ZERO TO THREE
Early connections last a lifetime

Positive parenting describes a set of parental behaviors that foster a child's capacity to **love, trust, explore and learn**. The goal of positive parenting is to help parents guide their children's healthy development in the context of the family's culture. Key elements of positive parenting include the ability to:

Understand or imagine the **child's point of view**, especially during challenging moments.

Respond with interest and **sensitivity** to the child's cues.

Recognize that **parenting can be stressful** and missteps are a natural part of child-rearing.

Recognize and **celebrate** the child's strengths, abilities, and capacity to learn and develop.

Provide consistent, **age-appropriate guidelines** and limits for child behavior.

Work toward a **balance** of meeting parental needs and child needs.

Delight in **moments of connection** with the child.

Recognize and **regulate their own feelings** and behaviors before they respond to the child.

Seek help, support or additional information on parenting when needed.

Parenting Guide For Babies

Kyra Karmiloff, Annette Karmiloff-Smith

Parenting Guide For Babies:

Understanding Your Baby Kyra Karmiloff, Annette Karmiloff-Smith, 2015-05-04 Babies arrive in the world already equipped with many skills reflexes and instincts that help them adapt to and influence their environment as well as the people who fill it The mother and daughter team of Kyra Karmiloff a research psychologist and Dr Annette Karmiloff Smith a professorial research fellow at the Developmental Neurocognition Lab at Birkbeck College University of London translate the latest scientific findings on infant behaviour the development of gross and fine motor skills and intelligence and how infants produce language and experience the social world as well as offering helpful tips and suggestions about how parents can positively influence their child s journey towards independence
