Hozumi Tanaka,1991 In the last decade AI firmly settled into our industrial society with the expert systems as the  
representative product However almost every one of the systems could cover only a single task domain In the highly  
mechanized world of the 21st century systems will become smart and user friendly enough to cover a wide range of task  
domains Systems with much user friendliness must be multilingual because users in different domains usually have different  
languages Language is formed in its own culture Therefore promotion for cross cultural scientific interchange will be  
indispensable for the progress of AI      *Annual Conference Proceedings* American Society for Engineering Education.
