Philadelphia Inquirer      **Anti-Technological Ideas in Michael Crichton's "Westworld"** Nico Reiher, 2010-07-26 Seminar paper from the year 2009 in the subject American Studies Literature grade 2.0 San Diego State University English course English 409 Science Fiction language English abstract Michael Crichton's *Westworld* is a comparatively modern science fiction movie released in 1977. It displays the existence as well as the eventual collapse of a futuristic theme park inhabited by robots. Overall, the movie features an anti-technological message which serves as a warning for humanity rather than functioning exclusively in order to provoke action, suspense, and general entertainment. This hypothesis will be discussed by considering Crichton's understanding of technology's role in human life and by examining particular features of the actual film. Eventually, *Westworld* will be put in context with other works of Crichton as well as with further contemporary movies addressing the same subject.

**The Andromeda Strain** Michael Crichton, 2012-05-14 From the author of *Jurassic Park*, *Timeline*, and *Sphere* comes a captivating thriller about a deadly extraterrestrial microorganism which threatens to annihilate human life. Five prominent biophysicists have warned the United States government that sterilization procedures for returning space probes may be inadequate to guarantee uncontaminated re-entry to the atmosphere. Two years later, a probe satellite falls to the earth and lands in a desolate region of northeastern Arizona. Nearby, in the town of Piedmont, bodies lie heaped and flung across the ground, faces locked in frozen surprise. What could cause such shock and fear? The terror has begun, and there is no telling where it will end.
