Agroforestry for Sustainable Land-Use Fundamental Research and Modelling with Emphasis on Temperate and Mediterranean Applications Daniel Auclair, C. Dupraz, 2013-03-09 This volume comprises a selection of original contributions presented at a workshop held in Montpellier France in June 1997 The two main objectives of the workshop were firstly to bring together what is understood about the processes underlying agroforestry practice and secondly to provide a forum to explore relevant models and modelling approaches The workshop was also able to play a role in examining the agroforestry systems

Breeding Oilseed Brassicas Kuldeep S. Labana, Surinder S. Banga, Shashi K. Banga, 2013-11-09. The present status of rapeseed mustard crops as the third most important source of edible oils is attributable to the success of plant breeders and associate researchers in developing high yielding varieties with improved quality and resistance to biotic and abiotic stresses. However, the need to maximize the production gains and quality at lower economic costs is greater than ever before. Breeding Oilseed Brassicas was thus conceived to review the past accomplishments in order to identify research gaps and suggest ways and means to meet the challenge of sustainable productivity upgradation. Theoretical and applied aspects of breeding genetics, cytogenetics, crop physiology and biotechnology are covered. The emphasis is on the application of theoretical knowledge to the solution of problems that confront the Brassica breeders.
