Michael P. Hornsby-Smith,John Fulton,Margaret Norris,1995 This book provides the first in depth case study of Renew a pastoral programme of religious revitalization The programme originated in the United States in 1976 and has been widely adopted throughout the Roman Catholic world Initiated from the top down in a hierarchically structured church it can be seen as an example of clerical attempts to stimulate and control lay spirituality in an organizationally controlled manner as opposed to grass roots movements such as those associated with liberation theology The authors look at the history of religious organizations in the Roman Catholic Church and the affects of modernity on religious practice and the decline in the latter which prompted the diocese to adopt Renew Their findings show that the effects of Renew were limited and short lived an inevitable consequence of the ambiguous and often contradictory aims In analysing these findings they suggest some ways in which the church might reform itself by decentralization and a reform of the papacy for example to meet the challenges of the modern age
