Gaming and Gamers in Times of Pandemic

Piotr Siuda, Jakub Majewski, Krzysztof Chmielewski, 2024-01-11. This edited collection brings in multiple scholarly perspectives to examine the impact of the pandemic and resulting government policies, especially lockdowns, on one particular cultural sphere: games. The COVID-19 pandemic has impacted virtually every aspect of our lives, regardless of where we live. In the initial months, many industry reports noted the unexpected positive impact on online digital game sales. Games were not just lockdown proof but boosted by lockdowns. Stay-at-home orders triggered a rush toward games as an alternative form of entertainment, and the ubiquity of mobile phones allowed wider than ever participation. *Gaming and Gamers in Times of Pandemic* studies how the COVID-19 pandemic affected game players, game developers, game journalists, and game scholars alike in many other ways, starting with the most direct: illness and sometimes death. Some effects are temporary, others are here to stay.

[Regulating the Metaverse](#) Ignas Kalpokas, Julija Kalpokienė, 2023-01-26. The metaverse seems to be on everybody's lips, and yet very few people can actually explain what it means or why it is important. This book aims to fill the gap from an interdisciplinary perspective informed by law and media and communications studies. Going beyond the optimism emanating from technology companies and venture capitalists, the authors critically evaluate the antecedents and the building blocks of the metaverse, the design and regulatory challenges that need to be solved, and commercial opportunities that are yet to be fully realised. While the metaverse is poised to open new possibilities and perspectives, it will also be a dangerous place, one ripe with threats ranging from disinformation to intellectual property theft to sexual harassment. Hence, the book offers a useful guide to the legal and political governance issues ahead while also contextualising them within the broader domain of governance and regulation of digital technologies.
