offer children opportunities for interaction and learning not available in traditional television viewing or solo video game play. In this book Michael Dezuanni examines why Let's Play videos are so appealing to children looking in particular at videos of Minecraft gameplay. He finds that a significant aspect of the popularity of these videos is the opportunity for knowledge and skill exchange. Focusing on Let's Play practices the videos themselves and fans' responses, Dezuanni argues that learning takes place through what he terms peer pedagogy, a type of nonhierarchical learning that is grounded in the personal relationships fans and players feel toward one another. Moreover, the Let's Play platform is part of a larger digital ecosystem that enables children to learn from one another in unique ways. Dezuanni explores how Let's Players enable learning opportunities, examining digital literacies, the Let's Play genre, and peer pedagogies. He then presents case studies of three successful, family-friendly Let's Players of Minecraft: StampyLonghead, StacyPlays, and KarinaOMG, microcelebrities in a microindustry. Dezuanni analyzes the specific practices and characteristics of these players, paying particular attention to how they create opportunities for peer pedagogies to emerge.

Do you want to get involved now while it is still a fairly new idea? The Metaverse can broadly be described as an online virtual environment where users can interact with the computing environment and other users. Playing VR games and chatrooms are probably the best examples of this, but the Metaverse is ever expanding and is quickly moving on to other areas which will include things like cryptocurrencies, NFTs, and other investments. This book,

You owe it to yourself to get ahead of the curve and make sure you know as much as you can, and **METAVERSE** is the book that will provide that information for you. What are you waiting for?
