Boom Byrne Hobart,Tobias Huber,2024-11-19 A timely investigation of the causes of technological and scientific stagnation and a radical blueprint for accelerating innovation Read this book for the alternative history of our age Peter Thiel investor and author of Zero to One A must read for those who seek to build the future Marc Andreessen cofounder of Netscape and Andreessen Horowitz From the Moon landing to the dawning of the atomic age the decades prior to the 1970s were characterized by the routine invention of transformative technologies at breakneck speed By comparison ours is an age of stagnation Median wage growth has slowed inequality and income concentration are on the rise and scientific research has become increasingly expensive and incremental Why are we unable to replicate the rate of progress of past decades What can we do to reinvigorate innovation In Boom Byrne Hobart and Tobias Huber take an inductive approach to the problem In a series of case studies tracking some of the most significant breakthroughs of the past 100 years from the Manhattan Project and the Apollo program to fracking and Bitcoin they reverse engineer how transformative progress arises from small groups with a unified vision vast funding and surprisingly poor accountability They conclude that financial bubbles while often maligned as destructive and destabilizing forces have in fact been the engine of past breakthroughs and will drive future advances In other words Bubbles aren t all bad Integrating
