## Your Windows everywhere

Sign in and your device is instantly alive because your personalization, desktop background, and settings are all there. Whether you set it up perfectly for you or change it often, when you sign in, even a brand-new PC lights up with everything that makes Windows yours. Anyone you share a PC with can have a personalized, cloud-connected experience through their own Microsoft account. Windows 8 gives you a seamless experience between your devices and your personal cloud services.

Start a project on one PC, and finish it on another. When you use the cloud to store your information, the boundaries between devices disappear. Your apps, games, music, photos, files, and settings aren't stored on one device, they're in one place: the cloud.

## Connected to your people

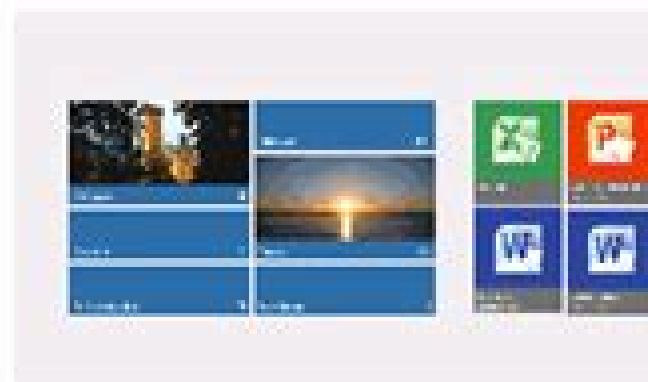

Use mail and messaging apps to communicate with all your friends, family, and coworkers. And you won't need to invite them twice. If you have contacts all over the place, you're in luck because whether you originally added a contact in Internet Messenger, Facebook, Twitter, Gmail, or some other service, if you choose to connect them, that contact is available in your apps as soon as you sign in to your Microsoft account. You can have a fully connected address book with the People app. See the people you care about, their updates, and all the different ways to communicate and share with them—all in one place. And you won't have to worry about losing your contacts. If you get a new Windows 8 PC or Windows Phone, the People app is your most complete address book.

The People app keeps you connected to the ones you care about.

## Connected to your files

Your Microsoft account is like a portable personal PC that appears on any Windows 8 device you're using. You'll be ready to pick up where you left just by signing in. There's another reason to put files in the cloud: with an Internet connection, photos and other files on Microsoft SkyDrive® are instantly as accessible as anything on your PC, and you can access them from any web-connected device.

Online and an Internet connection give you access to everything on your PC.

## Connect your apps to the cloud

Developers can take advantage of the services Microsoft provides so their apps will light up when they're connected to the cloud. When developers connect apps to the cloud using the Live SDK, they can take advantage of single sign-on, which gets users even deeper into their app experience because they'll be able to more easily share data and communicate with their friends and family.

Windows 8 is available in many languages.
