Race in the Anthropocene Farai Chipato, David Chandler, 2024-08-14 *Race in the Anthropocene* provides a radical new perspective on the importance of race and coloniality in the Anthropocene It forwards the Black Horizon as a critical lens which places at its heart the importance of ontological concerns fundamental to problematising the violences and exclusions of the antiblack world At present multiple new approaches are emerging through the shared problem field of Anthropocene thought and policy offering to save not just the world but the practice of governance the business of Big Data the progress of development and the dream of peace It is against this backdrop that *Race in the Anthropocene* unsettles not just the already shaky foundations of modernity but also the affirmative visions of its critics by directing our gaze to how race and coloniality are baked into the grounding concepts of international thought This book is essential reading for students of International Relations particularly those interested in international politics security and development It is also of relevance for those interested in contemporary social political and environmental debates and policy practices

Algorithms of Education Kalervo N. Gulson, Sam Sellar, P. Taylor Webb, 2022-05-17 A critique of what lies behind the use of data in contemporary education policy While the science fiction tales of artificial intelligence eclipsing humanity are still very much fantasies in *Algorithms of Education* the authors tell real stories of how algorithms and machines are transforming education

governance providing a fascinating discussion and critique of data and its role in education policy Algorithms of Education explores how for policy makers today s ever growing amount of data creates the illusion of greater control over the educational futures of students and the work of school leaders and teachers In fact the increased datafication of education the authors argue offers less and less control as algorithms and artificial intelligence further abstract the educational experience and distance policy makers from teaching and learning Focusing on the changing conditions for education policy and governance Algorithms of Education proposes that schools and governments are increasingly turning to synthetic governance a governance where what is human and machine becomes less clear as a strategy for optimizing education Exploring case studies of data infrastructures facial recognition and the growing use of data science in education Algorithms of Education draws on a wide variety of fields from critical theory and media studies to science and technology studies and education policy studies mapping the political and methodological directions for engaging with datafication and artificial intelligence in education governance According to the authors we must go beyond the debates that separate humans and machines in order to develop new strategies for and a new politics of education **ASHRAE Handbook** ,2007 **The Social Power of Algorithms** David Beer,2019-10-23 The vast circulations of mobile devices sensors and data mean that the social world is now defined by a complex interweaving of human and machine agency Key to this is the growing power of algorithms the decision making parts of code in our software dense and data rich environments Algorithms can shape how we are retreated what we know who we connect with and what we encounter and they present us with some important questions about how society operates and how we understand it This book offers a series of concepts approaches and ideas for understanding the relations between algorithms and power Each chapter provides a unique perspective on the integration of algorithms into the social world As such this book directly tackles some of the most important questions facing the social sciences today This book was originally published as a special issue of Information Communication Society Dissertation Abstracts International ,2008 *Documentation Abstracts* ,1998 **Integration of Efficient Design Technologies** F.
