Merle Coulter Princeton Legacy Library:

John Merle Coulter Andrew Denny Rodgers III, 2015-12-08 John Merle Coulter contributed tremendously to the rapid advance of botany in North America during the late nineteenth and early twentieth centuries. An exploring mind, deeply religious spirit, and scientist's respect for truth combined with singular personal charm made of him not only a missionary in science but a natural leader among the botanists of the United States. He set for his goal the building of a complete structure of the house of botany and he took the lead in organizing defined branches of study which eliminated the waste of duplicated effort. The thread of this story of his life is maintained largely through excerpts of the correspondence of Coulter and his associates and by means of articles from the *Botanical Gazette* which he founded. Originally published in 1944, The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

The Establishment of Science in America Sally Gregory Kohlstedt, Michael Mark Sokal, Bruce V. Lewenstein, 1999. A history of the American Association for the Advancement of Science providing insight into the development of science in the USA in the last 150 years. This work covers matters such as scientists' role in society, public attitudes towards science, and the sponsorship of research.
