Methodological Foundations Of Macroeconomics Keynes And Lucas Author Alessandro Vercelli Feb 2003:

Methodological Foundations of Macroeconomics Alessandro Vercelli, 1991-09-26 This book is an investigation of the methodological and epistemological foundations of macroeconomic theory based on an examination of the theories of Keynes and Lucas. It is divided into two parts. In the first Professor Vercelli discusses the methodological issues which lie behind the conflict among different schools of thought in macroeconomics: equilibrium and disequilibrium, risk and uncertainty, rationality and causality. These issues are central to the current debate not only in many branches of economics but also in other scientific disciplines. The traditional point of view of science based on equilibrium, stability and determinism has been increasingly challenged by a new point of view in which disequilibrium, instability and uncertainty play a crucial role. This, the author argues, is bound to put macroeconomics in a new, more promising position. In the second part of the book the author compares the two main alternative research programmes in macroeconomics that outlined by Keynes in his General Theory and that suggested by Lucas, the leader of the new classical economists. Methodological Foundations of Macroeconomics Alessandro Vercelli, 1991-09-26 This book is an investigation of the methodological and epistemological foundations of macroeconomic theory based on an examination of the theories of Keynes and Lucas. Professor Vercelli first discusses the methodological issues that lie behind the conflict among different schools of thought in macroeconomics: issues that are central not only to many branches of economics but also to other scientific disciplines. The author compares the two main alternative research programs in macroeconomics that outlined by Keynes in his General Theory and that suggested by Lucas, the leader of the new classical economists. After examining the methodological underpinnings of these conflicting views he concludes that a Keynesian conception of macroeconomics as a discipline autonomous from microeconomics and open to theoretical and methodological innovation should be defended, thus excluding fundamentalism either of the Keynesian or new classical varieties.
