**Theory and Methods of Economic Evaluation of Health Care** Magnus Johannesson,1996-05-31 Most economic evaluations of health care programmes at the moment are cost effectiveness and cost utility analyses The problem with these methods is that their theoretical foundations are unclear This has led to confusion about how to define the costs and health effects and how to interpret the results of these studies In the environmental and traffic safety fields it is instead common to carry out traditional cost bene fit analyses of health improving programmes This striking difference in how health programmes are assessed in different fields was the original motivation for writing this book The aim of the book is to tty and provide a coherent framework within cost bene fit analysis and welfare economics for the different methods of economic evaluation in the health care field The book is written in an easily accessible manner and several examples of applications of the different methods are provided It is my hope that it will be useful both for teaching purposes and as a guide for practitioners in the field Glenn C Blomquist John D Graham Rich O Conor and four anonymous referees provided helpful

comments on previous versions of the manuscript I would also like to express my gratitude to the following persons for helping me to prepare the manuscript Carl Magnus Berglund Carin Blanksvard Ann Brown and Ziad Obeid **Health Economics** Ceri J. Phillips, 2008-04-15 This book provides all the necessary information in a readable style that can be understood by anyone with even the most basic knowledge of mathematics. Health Economics is ideal for all health professionals who are required to make policy decisions including hospital managers, clinical directors and partners in family practices. It is suited to health policy makers at national level as well as those in local trusts. The clear and concise way in which the book is written also makes it a perfect introductory text for students of health economics. Health Economics provides you with the tools to Read and critique economic evaluations. Understand the economic forces at work in specific environments. Make optimum choices in terms of benefits and outcomes.

*Clinical Pain Management Second Edition: Chronic Pain* Peter Wilson, Paul Watson, Jennifer Haythornwaite, Troels Jensen, 2008-09-26 The second edition of Chronic Pain now covers a vast scientific and clinical arena with the scientific background and therapeutic options much expanded. In common with the other titles comprising Clinical Pain Management the volume gathers together the available evidence based information in a reader friendly format without unnecessary detail and is divided into three parts. The broad coverage under Part One encompasses basic science including applied physiology, genetics and epidemiology through societal aspects of chronic pain and disability to patient assessment, diagnostic procedures and outcome measures. Part Two considers the different therapies available including pharmacological, psychological, behavioural, interventional and alternative. In Part Three specific and non specific pain syndromes and their management are described including pain in neurological disease in HIV and AIDS patients and after surgery or spinal cord injury, regional pain in the head, face, neck, back, joints, chest, abdomen and pelvis and issues related to pain in children, the elderly and in association with substance misuse.

**Economic Evaluation in Health Care** Michael Drummond, M. F. Drummond, Alistair McGuire, 2001 To accompany the hugely successful Methods for Economic Evaluation of Health Care Programmes 2e this book is a thorough and rigorous discussion of the methodological principles and recent advances in the rapidly advancing field of theory and practice of economic evaluation in health care. Written by an internationally acclaimed group of authors the book provides an in depth discussion of the latest theoretical advances and gives comprehensive reviews of the available literature. The book covers the main areas of economic evaluation including the methods for measuring costs and outcomes, the collection of data alongside clinical studies, ways of handling uncertainty, discounting and issues relating to the transferability of economic data.
