SFM practices incorporating the REDD Programme and biodiversity conservation in forest ecosystems The project established sound foundations that improve the monitoring of the conditions of forest ecosystems and consequently more robust information is generated and with greater frequency It is worth highlighting the creation of an interinstitutional structure that will support the continuity of the SIMEF and the creation of a digital platform with five tools The SIMEF is at present a regular programme of the Chilean State with a governance system and with a permanent annual budget Given this the sustainability of the achievements made in the project can be maintained and strengthened However a low level of appropriation of the system at local level was identified which could affect its sustainability **Microsoft Excel 2000**
