The Microsoft Technology Associate (MTA) certification is an entry-level certification which serves as a good starting point for students and educators who may eventually progress to the Microsoft Technology Specialist (MCTS) or higher programs. Simply put, it assesses the foundational knowledge necessary to pursue MCTS, MCITP, or MCPD certifications. The certification focuses more on knowledge and a little less on skills. However, the knowledge areas are all based on MS products, so you must know those products inside and out. Questions on the general knowledge are relatively easy; product and technology-specific technical questions, however, are way more difficult. This is why we developed this study product: we focus on those difficult topics that involve difficult technical skills. We want you to be able to answer these difficult questions and secure exam success accordingly.
