## Elementary School Example: 3-PS2-3

Two magnets are placed right next to each other. They seem to pull together. A third magnet is then placed right next to the first two magnets. This magnet seems to push away from the first two.

The ability of magnets to attract and repel each other is shown in the Attraction and Repulsion between Magnets picture. In this picture, some of the magnets are floating due to their ability to repel other magnets.

**Attraction and Repulsion  
between Magnets**

### Part A

Select a testable, scientific question that can be answered by performing an experiment with the setup shown in the Hanging Magnets Experiment picture.

- ☐ How does the distance between the magnets affect the force?
- ☐ How does the orientation of the magnets affect the force?
- ☐ Will the force between the magnets always exist?

Some questions not shown

### Part C

Use the Hanging Magnets Experiment simulation to run the experiment and gather observations to answer your question from part A.

First, select the Distance and Orientations. You must select an orientation for each magnet in each trial. Then, click Start to run the simulation.

- You will be limited to **three** trials in the experiment.
- Be sure the final data table includes data that answers your question.
- Click on the trash can button if you want to delete a row and generate new data.

*Teaching Science to English Language Learners* Luciana C. de Oliveira, Kristen Campbell Wilcox, 2017-09-18 This edited collection explores how science can be taught to English language learners ELLs in 21st century classrooms The authors focus on the ways in which pre service and in service science teachers have developed or may develop instructional effectiveness for working with ELLs in the secondary classroom Chapter topics are grounded in both research and practice addressing a range of timely topics including the current state of ELL education in the secondary science classroom approaches to leveraging the talents and strengths of bilingual students in heterogeneous classrooms best practices in teaching science to multilingual students and ways to infuse the secondary science teacher preparation curriculum with ELL pedagogy This book will appeal to an audience beyond secondary content area teachers and teacher educators to all teachers of ELLs teacher educators and researchers of language acquisition more broadly

Developing Assessments for the Next Generation Science Standards National Research Council, Division of Behavioral and Social Sciences and Education, Board on Science Education, Board on Testing and Assessment, Committee on Developing Assessments of Science Proficiency in K-12, 2014-05-29 Assessments understood as tools for tracking what and how well students have learned play a critical role in the classroom Developing Assessments for the Next Generation Science Standards develops an approach to science assessment to meet the vision of science education for the future as it has been elaborated in *A Framework for K 12 Science Education Framework* and *Next Generation Science Standards NGSS* These documents are brand new and the changes they call for are barely under way but the new assessments will be needed as soon as states and districts begin the process of implementing the NGSS and changing their approach to science education The new Framework and the NGSS are designed to guide educators in significantly altering the way K 12 science is taught The Framework is aimed at making science education more closely resemble the way scientists actually work and think and making instruction reflect research on learning that demonstrates the importance of building coherent understandings over time It structures science education around three dimensions the practices through which scientists and engineers do their work the key crosscutting concepts that cut across disciplines and the core ideas of the disciplines and argues that they should be interwoven in every aspect of science education building in sophistication as students progress through grades K 12 Developing Assessments for the Next Generation Science Standards recommends strategies for developing assessments that yield valid measures of student proficiency in science as described in the new Framework This report reviews recent and current work in science assessment to determine which aspects of the Framework's vision can be assessed with available techniques and what additional research and development will be needed to support an assessment system that fully meets that vision The report offers a systems approach to science assessment in which a range of assessment strategies are designed to answer different kinds of questions with appropriate degrees of specificity and provide results that complement one another Developing Assessments

for the Next Generation Science Standards makes the case that a science assessment system that meets the Framework's vision should consist of assessments designed to support classroom instruction assessments designed to monitor science learning on a broader scale and indicators designed to track opportunity to learn New standards for science education make clear that new modes of assessment designed to measure the integrated learning they promote are essential The recommendations of this report will be key to making sure that the dramatic changes in curriculum and instruction signaled by Framework and the NGSS reduce inequities in science education and raise the level of science education for all students
