Intelligent Multimedia Signal Processing for Smart Ecosystems Shabir A. Parah, Nasir N. Hurrah, Ekram Khan, 2023-09-30

A smart ecosystem is envisioned to exchange and analyze data across systems enabling a flexible, faster and reliable smart ecosystem for high quality results at reduced costs and little human intervention. This book introduces many innovative approaches and provides solutions to various problems of smart ecosystems designed by employing various techniques and models based on AI, ML, Deep Learning and the Internet of Things (IoT). The main focus is on intelligent multimedia processing and automated decision making for various services, real time data analysis, data security, cost effective solutions for multimedia applications, smart information processing systems and smart city planning to name a few. In addition, this book presents some key insights and future directions in the various areas of technology. Throughout the book, many state of the art solutions concerning various applications are proposed to solve the issues and ensure the quality of services (QoS). The authors discuss the limitations of the current techniques used to design a smart ecosystem and highlight some prospective areas of research in the future. The book comprehensively discusses multimedia processing of various forms of data comprising text, images and audio for the implementation of various solutions. The book is aimed to open many areas of research and thus would present a comprehensive reference for the design of smart ecosystems in various applications.

Mechatronic Futures Peter Hohenberger, David Bradley, 2025-06-23. This book is a new and revised edition of *Mechatronic Futures*. It sets out to identify and discuss the key issues likely to impact on the design and implementation of future mechatronic systems. In doing so, it offers a comprehensive overview of the challenges, risks and options that define the future of mechatronics and provides insights into how these issues are currently being assessed and managed. The book aims to support mechatronics practitioners in identifying key areas in design, modelling and technology and to place these in the wider context of concepts such as cyber physical systems, Digital Twins and the Internet of Things, and alongside issues such as privacy, security and sustainability. For educators, it considers the potential effects of developments in these areas on mechatronic course design and ways of integrating these. Written by experts in the field, it explores topics including systems integration, design, modelling, privacy, ethics, lifecycle monitoring, sustainability and other potential future application domains. This new edition contains many new chapters as well as updated and revised chapters from the previous edition and takes into account how recent significant developments in artificial intelligence and cyber security are changing how current mechatronic systems are designed, manufactured, operated, used and potentially recycled. Highlighting novel innovations and directions, the book is intended for academics, engineers, managers, researchers and students working in the field of mechatronics, particularly those developing new concepts, methods and ideas.
