New observations on the natural history of bees by François Huber When I had the honour at Genthod of giving you an account of my principal experiments on bees you desired me to transmit a written detail that you might consider them with greater attention I hasten therefore to extract the following observations from my journal As nothing can be more flattering to me than the interest you take in my researches permit me to remind you of your promise to suggest new experiments We are delighted to publish this classic book as part of our extensive Classic Library collection Many of the books in our collection have been out of print for decades and therefore have not been accessible to the general public The aim of our publishing program is to facilitate rapid access to this vast reservoir of literature and our view is that this is a significant literary work which deserves to be brought back into print after many decades The contents of the vast majority of titles in the Classic Library have been scanned from the original works To ensure a high quality product each title has been meticulously hand curated by our staff Our philosophy has been guided by a desire to provide the reader with a book that is as close as possible to ownership of the original work We hope that you will enjoy this wonderful classic work and that for you it becomes an enriching experience *New Observations on the Natural History of Bees* Huber François, 2016-06-23

Unlike some other reproductions of classic texts 1 We have not used OCR Optical Character Recognition as this leads to bad quality books with introduced typos 2 In books where there are images such as portraits maps sketches etc We have endeavoured to keep the quality of these images so they represent accurately the original artefact Although occasionally there may be certain imperfections with these old texts we feel they deserve to be made available for future generations to enjoy [New observations on the natural history of bees. François Huber July 2 1750 December 22 1831 also known as Francis in English publications or Franz in German publications was a Swiss entomologist who specialized in honey bees His pioneering work was recognized all across Europe and based on thorough observation with the help of several assistants due to his blindness He became interested in honey bees after being read the works of René R. Aumour and Charles Bonnet He also had a conversation with the latter who was also based in Geneva His curiosity was focused on the history of these insects His initial desire was to verify some facts and then fill in missing information Since he was now blind he had to rely on the help of others *New Observations on the Natural History of Bees (Classic Reprint)* Francis Huber, 2017-05-28
