Pantone Coating Color Formula Guide:

Color in Graphic Design Daniela Queiroz, Lucas Almeida, 2020-02-25 Color is an essential factor in design considering that it has a significant impact on the performance of the brand's communication marketing and sales. The color should not be chosen just because we like it or because we think it looks good since these are subjective values. There must be research on their meanings and associations, always remembering that they depend on cultural perceptions and that it is therefore important to know the audience we are working for. We often face the situation of not knowing which colors to choose for each of our designs due to the lack of knowledge about color theory and psychology. Unfortunately, the internet is full of inaccurate information. Still, in this e-book, we have addressed these topics correctly so the color selection process for each of your projects becomes an easy task. *Pantone Color Formula Guide*, 1999

Pantone Color Formula Guides Pantone, Inc. (Carlstadt, NJ), 2009 Includes eight indispensable color guides that every print and graphic design professional requires to ensure quality results. This value package provides the basics for selecting, specifying, and matching both solid and process colors. Accompanying publisher's descriptive sheet.
