Relevant Query Answering over Streaming and Distributed Data Shima Zahmatkesh, Emanuele Della Valle, 2020-01-21

This book examines the problem of relevant query answering over the Web and provides a comprehensive overview of relevant query answering over streaming and distributed data. In recent years Web applications that combine highly dynamic data streams with data distributed over the Web to provide relevant answers have attracted increasing attention. Answering in a timely fashion i.e. reactively is one of the most important performance indicators especially when the distributed data is evolving. The book proposes a solution that retains a local replica of the distributed data and offers various maintenance policies to refresh the replica over time. A limited refresh budget guarantees the reactivity of the system. Focusing on stream processing and Semantic Web it appeals to scientists and graduate students in the field.

Elements of Programming Interviews Adnan Aziz, Tsung-Hsien Lee, Amit Prakash, 2012. The core of EPI is a collection of over 300 problems with detailed solutions including 100 figures, 250 tested programs and 150 variants. The problems are representative of questions asked at the leading software companies. The book begins with a summary of the nontechnical aspects of interviewing such as common mistakes, strategies for a great interview, perspectives from the other side of the table, tips on negotiating the best offer and a guide to the best ways to use EPI. The technical core of EPI is a sequence of chapters on basic and advanced data structures, searching, sorting, broad algorithmic principles, concurrency and system design. Each chapter consists of a brief review followed by a broad and thought provoking series of problems. We include a summary of data structure algorithm and problem solving patterns.

Interactive Multimedia and Next Generation Networks Vincent Roca, Franck Rousseau, 2004-10-26. Interactive Distributed Multimedia Systems (IDMS) and Protocols for Multimedia Systems (PROMS) have been two successful series of international events bringing together researchers, developers and practitioners from academia and industry in all areas of multimedia systems. These two workshops successfully merged in 2003 and now constitute the MIPS workshop. After the outstanding MIPS 2003 workshop organized in Naples, Italy by Giorgio Ventre and Roberto Canonico from the University of Naples Federico II, MIPS 2004 moved to Grenoble, France. Following the great tradition, MIPS 2004 was intended to contribute to scientific, strategic and practical advances in the area of distributed multimedia applications, protocols and intelligent management tools with emphasis on their provision over novel network architectures. This is undoubtedly a rather broad area which is confirmed by the large range of topics that were addressed in the submitted and accepted papers. This year the Call for Papers attracted 74 submissions essentially from Europe and Asia plus a few contributions from North America, the Middle East and Africa for a total of 20 countries. We would like to express our warmest gratitude to all the authors without whom organizing this event would have been impossible. Thanks to the outstanding work of the Program Committee and the additional reviewers, 20 full-sized papers and 5 additional short papers were finally accepted which was not an easy task. Like MIPS 2003, MIPS 2004 remained a highly selective event: 33%

acceptance ratio including the short papers which is the best warrant of a good program quality *Elements of Programming Interviews in Java* Adnan Aziz, Tsung-Hsien Lee, Amit Prakash, 2012 The core of EPI is a collection of over 300 problems with detailed solutions including 100 figures 250 tested programs and 150 variants The problems are representative of questions asked at the leading software companies The book begins with a summary of the nontechnical aspects of interviewing such as common mistakes strategies for a great interview perspectives from the other side of the table tips on negotiating the best offer and a guide to the best ways to use EPI The technical core of EPI is a sequence of chapters on basic and advanced data structures searching sorting broad algorithmic principles concurrency and system design Each chapter consists of a brief review followed by a broad and thought provoking series of problems We include a summary of data structure algorithm and problem solving patterns *Elements of Programming Interviews in Python* Adnan Aziz, Tsung-Hsien Lee, Amit Prakash, 2019-12-02 Have you ever Wanted to work at an exciting futuristic company Struggled with an interview problem that could have been solved in 15 minutes Wished you could study real world computing problems If so you need to read *Elements of Programming Interviews* EPI EPI is your comprehensive guide to interviewing for software development roles The core of EPI is a collection of over 250 problems with detailed solutions The problems are representative of interview questions asked at leading software companies The problems are illustrated with 200 figures 300 tested programs and 150 additional variants The book begins with a summary of the nontechnical aspects of interviewing such as strategies for a great interview common mistakes perspectives from the other side of the table tips on negotiating the best offer and a guide to the best ways to use EPI We also provide a summary of data structures algorithms and problem solving patterns Coding problems are presented through a series of chapters on basic and advanced data structures searching sorting algorithm design principles and concurrency Each chapter starts with a brief introduction a case study top tips and a review of the most important library methods This is followed by a broad and thought provoking set of problems A practical fun approach to computer science fundamentals as seen through the lens of common programming interview questions Jeff Atwood Co founder Stack Overflow and Discourse *On the Move to Meaningful Internet Systems 2005: CoopIS, DOA, and ODBASE* R.
