**FLUX:** All Nelson shear connectors have a solid flux load.

Nelson studs deliver code specified shear strength values as used in composite construction, securing concrete to steel structural components.

**Headed anchors** are widely use in precast, cast in place or composite steel construction for miscellaneous embedded plates, frames, curbing, attachments and connections.

**Shear connectors** are typically used in composite steel construction for holding concrete slabs to steel members to resist shear forces and increase shear loading capacity in steel buildings, bridges, columns caissons, containment liners, etc. They also act as embedment anchors on miscellaneous embedded plates, frames, angles, strip plates, attachments and connections. Options for Welding Through Metal Deck are available for all studs.
