the need to update the law to adapt to change and present innovative analyses of various strategies to influence EU copyright policies     Governing Pandora Andrea Bonime-Blanc,2026-02-02 A road map for developing responsible and innovative governance systems based on generative AI and other exponential technologies As exponential technology rapidly advances leaders in every sector are faced with the challenge of harnessing its potential power while developing precautionary safeguards against its risks From generative artificial intelligence to the future of quantum computing these innovations are transforming the world at an unprecedented rate leaving decision makers unsure of how to maintain control and ensure responsible development Governing Pandora focuses on multiple exponential technologies in order to demonstrate how leaders can develop responsible and innovative governance systems This book equips leaders with frameworks and tools including a detailed five element exponential governance mind set to develop a more holistic tech governance approach for current and future waves of exponential tech Andrea Bonime Blanc encourages the development of a culture of collaboration across borders sectors and disciplines as technology takes on a bigger role in our ecosystem She explains the context risks and opportunities of the ongoing exponential technology revolution so that leaders can futureproof themselves their organizations and key stakeholders with strategies and tactics to act responsibly ethically and successfully This book speaks directly to executives board members policymakers and organizational leaders who are tasked with charting a course through the advancement of modern technologies Governing Pandora bridges the gap between exploring pure technology and managing and governing applied technology Readers will learn not only how to develop a governance mind set for exponential technology but also how to build organizational resilience     **Proceedings of the International Conference on Law and Technology (ICLT 2025)** Tabrez Ahmad,Rashmi Kunebelakere Siddappa,Azimkhan B. Pathan,Farhana Helal Mehtab,Upankar Chutia,2026-01-25 This open access book presents the select proceedings of the International Conference on Law and Technology ICLT 2025     *Artificial Intelligence Law* Edward Swan,2024-03-18 It is inevitable given the enormous media driven concern generated by the recent application of artificial intelligence AI to an ever expanding spectrum of day to day human experience that the need for a clearly articulated legal response has become imperative This book both clarifies the controversial issues surrounding the use of AI and explores in great detail how far from being unregulated the creation distribution and operation of AI systems currently is and will remain subject to a vast array of existing laws and regulations all over the world Demonstrating beyond any doubt that the traditional concepts of legal responsibility including duty of care negligence and compensation for damages will always be applicable to those humans who create and or use artificially intelligent things or systems the author shows how AI systems are clearly implicated in numerous existing legal regimes including the following relevant provisions under international law and EU law applicable provisions in the laws of the United States the United Kingdom France China India Japan South Korea and Singapore and numerous national provisions in the legal fields of health and safety intellectual property competition privacy and data

protection and military engagement However given the lack of international consensus on this vitally important issue the author suggests that any worldwide agreement on the legal responsibilities relating to the use of AI will need to be carefully defined and that provisions will need to be reviewed to determine how they will apply to any new range of artificially intelligent creations The purpose of this book is to review those legal concepts throughout the world that currently govern the application of AI and to comment on modifications or extensions of the rule of law that are being proposed as necessary to serve and protect humanity in relation to the expanding applications of AI It is important that anyone who uses or is affected by AI products understands the relationship between existing laws and regulations in major markets around the world and those areas where initial regulations may be required For them for their counsel and for the various policy and regulatory authorities confronted with AI issues this book will prove an essential guide *Leadership 2.0 in processes of a sustainable change* Prof. Dr. Michael Kurwan,2025-06-30 Document from the year 2025 in the subject Leadership and Human Resources Leadership language English abstract In order to successfully implement sustainable changes in a company in the context of change processes strong leadership is required at the top of a company which should have a great deal of empathy and a sure instinct in order to position the company in the market in the long term and profitably In order to successfully shape these sustainable changes it will not be the famous power of the leader of the past but will only work with the involvement of employees in the new world of work in the knowledge age which is characterized by digitalization and artificial intelligence This new form of leadership is also referred to as Leadership 2 0 in which it is important to retain top performers and in particular key personnel in the company in the long term which is a very challenging leadership task in HR management In change processes a fundamental distinction must be made between incremental change management and radical change management While incremental change takes place continuously and is integrated into everyday working life radical change represents a strategic realignment of the company which is largely associated with staff reductions and is intended to change the corporate culture This is particularly true in the case of restructuring where cost cutting programs play a decisive role in ensuring the long term survival of the company Employees are more willing to go along with incremental change also known as continuous improvement than radical change as they could also be affected by staff cuts This fuels employees fears and therefore often leads to high staff turnover **Digitising Cultural Heritage** Pinar Oruç,2025-07-10 Investigates the impact of copyright law on the digitisation of cultural heritage by analysing the theory the laws and the practice in the EU the UK and the US Specifications and Drawings of Patents Issued from the U.S. Patent Office United States.
