Alan Cassells, Peter B. Gahan

Neil A Campbell Jane B Reece Biology 6th Edition:

Biology Neil A. Campbell, Jane B. Reece, 2002-01 The authors have updated each of the books eight units to reflect the progress in our understanding of life at many levels from molecules to ecosystems The sixth edition has a new chapter that introduces students to science as a way of knowing nature A new feature highlights examples of the process of science throughout the book and each chapter contains a process of science question that encourages students to experience science Media activities allow additional practice with experimentation and analysis of data and interviews with various researchers humanize science as a social activity

Evolution and the Emergent Self Raymond L. Neubauer, 2012 This book examines how humans evolved from the cosmos and prebiotic earth and what types of biological chemical and physical sciences drove this complex process The author presents his view of nature which attributes the rising complexity of life to the continual increasing of information content first in genes and then in brains

The Educated Eye: Visual Culture and Pedagogy in the Life Sciences Michael R. Dietrich, 2012 A study of visual culture in the teaching of the life sciences The creation and processing of visual representations in the life sciences is a critical but often overlooked aspect of scientific pedagogy The Educated Eye follows the nineteenth century embrace of the visible in new spectatoria or demonstration halls through the twentieth century cinematic explorations of microscopic realms and simulations of surgery in virtual reality With essays on Doc Edgerton's stroboscopic techniques that froze time and Eames's visualization of scale in Powers of Ten among others contributors ask how we are taught to see the unseen Project Muse

The Dark Side of Charles Darwin Dr. Jerry Bergman, 2011-03-01 A single man stands behind the greatest deception in history Charles Darwin's ideas still penetrate every aspect of our culture including science religion and education And while much has been made of his contribution to the evolutionary hypothesis little has been publicized about the dark side of the man himself and how this may have impacted the quality and legitimacy of his research This daring and compelling book takes its readers behind the popular facade of a man revered worldwide as a scientific pioneer and unveils what kind of person Darwin really was The book reveals disturbing facts that will help you Perceive Darwin firsthand through the eyes of family and friends and his own correspondence Discern this darkly troubled man struggling with physical and mental health issues Uncover his views on eugenics and racism and his belief that women were less evolved than men Thoroughly documented this book reveals Darwin's less than above board methods of attempting to prove his so called scientific beliefs and his plot to murder God by challenging the then dominant biblical worldview
