Neufert Manual Architecture:

Architectures of Bureaucracy Jens van de Maele, 2025-01-27 This monograph examines the interrelationship between politics and modernist architecture in interwar Belgium focusing on political architectural and administrative elites as propagators of new ideas of governance. While Belgium was strongly influenced by neighbouring France and Germany, it also developed its own avant garde approaches to socio political problems. In the second half of the 1930s the country was the scene of a remarkable political and architectural experiment involving an ambitious plan for the large scale construction of modernist government office buildings. These buildings were seen as essential to the development of a technocratic model of governance aimed at strengthening the role of the executive and minimising the influence of parliament. More specifically the efficient new office architecture was supposed to create a new type of perfect civil servant whose loyalties would no longer lie with political parties but with scientists and management experts. Such experts and scientists constituted a rising elite of homines novi with strong though often veiled political ambitions. As such this book contributes to our understanding of political culture in the age of extremes.

Brick Architecture

Craft in Nineteenth-Century South India Priya Joseph,2025-03-18 This book explores brick architecture of the nineteenth century in South India through the lens of tectonics and materiality The book is a diachronically elaborated history of brick architecture especially analysing the hybridity due to the indigenous and colonial intersections of nineteenth century India It offers a decolonial reading of architecture through meticulous measured drawings as a tool and presents an argument for reading buildings as archives South India has thousands of dilapidated buildings which may be erased due to neglect lax laws and ignorance The book exposes the tectonics fixing material choices socio political circumstances of this architecture in brick This method of analysing the dilapidated buildings as an archive of construction forefronts the makers and the agency of the local craftspeople rather than an Anglo centric gaze Brick buildings such as the extravagantly ornamental and structurally rich Chatrams of Thanjavur Rosary Church Hassan and Fort School Bengaluru are some of the many cases elaborated in the book The book connects the history of brick to its many contemporary challenges and manifestations The book is intended for students and scholars of architecture history material culture colonial studies and the Global South as well as anyone interested in brick as material for architecture

Governing by Design Aggregate Architectural History Collaborative,2012-04-29

Governing by Design offers a unique perspective on twentieth century architectural history It disputes the primacy placed on individuals in the design and planning process and instead looks to the larger influences of politics culture economics and globalization to uncover the roots of how our built environment evolves In these chapters historians offer their analysis on design as a vehicle for power and as a mediator of social currents Power is defined through a variety of forms modernization obsolescence technology capital ergonomics biopolitics and others The chapters explore the diffusion of power through the establishment of norms and networks that frame human conduct action identity and design They follow design as it functions through the body in the home and at the state and international level Overall Aggregate views the intersection of architecture with the human need for what Foucault termed governmentality societal rules structures repetition and protocols as a way to provide security and tame risk Here the conjunction of power and the power of design reinforces governmentality and infuses a sense of social permanence despite the exceedingly fluid nature of societies and the disintegration of cultural memory in the modern era
