Kraushaar, 1969 [**Information Systems for Patient Care**](#) B. I.

Blum, 1984-04-30 Computer technology has impacted the practice of medicine in dramatic ways Imaging techniques provide non invasive tools which alter the diagnostic process Sophisticated monitoring equipment presents new levels of detail for both patient management and research In most of these high technology applications the computer is embedded in the device its presence is transparent to the user There is also a growing number of applications in which the health care provider directly interacts with a computer In many cases these applications are limited to administrative functions e.g. office practice management location of hospital patients appointments and scheduling Nevertheless there also are instances of patient care functions such as results reporting decision support surveillance and reminders This series Computers and Medicine will focus upon the direct use of information systems as it relates to the medical community After twenty five years of experimentation and experience there are many tested applications which can be implemented economically using the current generation of computers Moreover the falling cost of computers suggests that there will be even more extensive use in the near future Yet there is a gap between current practice and the state of the art [Capturing Social and Behavioral Domains and Measures in Electronic Health Records](#) Institute of Medicine, Board on Population Health and Public Health Practice, Committee on the Recommended Social and Behavioral Domains and Measures for Electronic Health Records, 2015-01-08 Determinants of health like physical activity levels and living conditions have traditionally been the concern of public health and have not been linked closely to clinical practice However if standardized social and behavioral data can be incorporated into patient electronic health records EHRs those data can provide crucial information about factors that influence health and the effectiveness of treatment Such information is useful for diagnosis treatment choices policy health care system design and innovations to improve health outcomes and reduce health care costs Capturing Social and Behavioral Domains and Measures in Electronic Health Records Phase 2 identifies domains and measures that capture the social determinants of health to inform the development of recommendations for the meaningful use of EHRs This report

is the second part of a two part study The Phase 1 report identified 17 domains for inclusion in EHRs This report pinpoints 12 measures related to 11 of the initial domains and considers the implications of incorporating them into all EHRs This book includes three chapters from the Phase 1 report in addition to the new Phase 2 material Standardized use of EHRs that include social and behavioral domains could provide better patient care improve population health and enable more informative research The recommendations of Capturing Social and Behavioral Domains and Measures in Electronic Health Records Phase 2 will provide valuable information on which to base problem identification clinical diagnoses patient treatment outcomes assessment and population health measurement **California Occupational Guide** ,1993
