James Wilson,2022-04-26 Technology advances are making tech more human This changes everything you thought you knew about innovation and strategy In their groundbreaking book Human Machine Accenture technology leaders Paul R Daugherty and H James Wilson showed how leading organizations use the power of human machine collaboration to transform their processes and their bottom lines Now as new AI powered technologies like the metaverse natural language processing and digital twins begin to rapidly impact both life and work those companies and other pioneers across industries are tipping the balance even more strikingly toward the human side with technology led strategy that is reshaping the very nature of innovation In Radically Human Daugherty and Wilson show this profound shift fast forwarded by the pandemic toward more human and more humane technology Artificial intelligence is becoming less artificial and more intelligent Instead of data hungry approaches to AI innovators are pursuing data efficient approaches that enable machines to learn as humans do

Instead of replacing workers with machines they're unleashing human expertise to create human centered AI. In place of lumbering legacy IT systems they're building cloud first IT architectures able to continuously adapt to a world of billions of connected devices. And they're pursuing strategies that will take their place alongside classic winning business formulas like disruptive innovation. These against the grain approaches to the basic building blocks of business Intelligence Data Expertise Architecture and Strategy IDEAS are transforming competition. Industrial giants and startups alike are drawing on this radically human IDEAS framework to create new business models optimize post pandemic approaches to work and talent rebuild trust with their stakeholders and show the way toward a sustainable future. With compelling insights and fresh examples from a variety of industries Radically Human will forever change the way you think about practice and win with innovation.

A deeply reported and business savvy chronicle of Tesla's wild ride. Walter Isaacson A masterclass in narrative journalism. Bradley Hope Exemplary. The Times An exceptional work. Washington Post Inside the outrageous come from behind story of Elon Musk and Tesla's bid to build the world's greatest car and the race to drive the future. Elon Musk is among the most controversial titans of Silicon Valley. To some he's a genius and a visionary and to others he's a mercurial huckster. Billions of dollars have been gained and lost on his tweets and his personal exploits are the stuff of tabloids. But for all his outrageous talk of mind uploading and space travel his most audacious vision is the one closest to the ground the electric car. When Tesla was founded in the 2000s electric cars were novelties trotted out and thrown on the scrap heap by carmakers for more than a century. But where most onlookers saw only failure a small band of Silicon Valley engineers and entrepreneurs saw potential and they pitted themselves against the biggest fiercest business rivals in the world setting out to make a car that was quicker sexier smoother cleaner than the competition. Tesla would undergo a truly hellish fifteen years beset by rivals pressured by investors hobbled by whistleblowers buoyed by its loyal supporters. Musk himself would often prove Tesla's worst enemy his antics repeatedly taking the company he had funded himself to the brink of collapse. Was he an underdog an antihero a conman or some combination of the three. Wall Street Journal tech and auto reporter Tim Higgins had a front row seat for the drama the pileups wrestling for control meltdowns and the unlikeliest outcome of all success. A story of power recklessness struggle and triumph. Power Play is an exhilarating look at how a team of eccentrics and innovators beat the odds and changed the future.
