Maps Catherine Delano-Smith, Roger J. P. Kain, 1999 Their principal objective is to explore the ways in which maps have interacted with society in England's past to analyse the roles that maps have played and the uses to which they have been put. It is often a story of discontinuity rather than evolution but the authors recognise many connections across the centuries at the same time seeking to avoid too insular a view noting the influence of ongoing intellectual and cartographic developments in the rest of Europe.
