Il J rgensen was a Polyhistor one of the very few in the highly specialized science of our time His interests and contributions in chemistry covered the whole Periodic Table This statement demonstrates the breadth of his interests however it also sheds light on the constraints of chemistry which deals with a large yet limited number of elements It is not surprising that J rgensen went beyond these limits exploring the probable or plausible chemistry of yet unknown elements and elementary particles such as quarks Even chemistry itself did not place rigid limits on his mind he was able to transfer his chemical concepts to scientific problems far beyond the normal such as in astrophysics Structure and Bonding is intimately associated with the name C K J gensen both as initiator and author over several decades The appearance of a special edition in memory of this great scientist is a self evident prolongation of his many contributions to the success of this series **Organometallic Compounds** ,1987 **Journal of the Chemical Society** Chemical Society (Great Britain), 1900 Titles of chemical papers in British and foreign journals included in Quarterly journal v 1 12 1.
