Uranometria 2000.0: Deep sky field guide ,2001 **National Audubon Society First Field Guide** Gary Mehlner,1999

A field guide to the night sky explaining through text and maps how to locate and identify stars planets meteors comets and constellations *Night Sky* Mark R. Chartrand,2001-04-14 This simple to use illustrated guide to the stars features information on stars constellations and more plus photos in full color and black and white *First Light and Beyond* D. A. Jenkins,2015-07-28 Amateur astronomers who have been disappointed by the results of an observing session can take comfort in the guidance of this book which advises how to still gain useful experience in seemingly failed nights at the telescope In a world with imperfect seeing conditions incredible observing sessions are often mixed with less inspiring ones discouraging the amateur observer This book is designed to minimize subsequent disappointment for astronomers who encounter a few bad observing sessions helping novice observers take something worthwhile away each and every time they go out under the night sky regardless of the observations that were originally planned Almost every observer remembers his first sight of ringed Saturn hanging in the blackness of space Practitioners agree that there is something special about visual observing Real time observations at the eyepiece can provide fleeting yet intense feelings that connect us with the universe in unique ways But when expectations aren't met at the eyepiece there are other ways to profit from the practice of astronomy These rewards though less showy are well worth cultivating This is a book that will help the reader see what constitutes a successful visual observing session It explains the nature of the objects that the observer is seeing and advises how best to use their equipment There are many hints and tips about how best to locate recall and record observations including suggestions for trips to areas where there are dark skies and to public observatories Amateur astronomy is a journey from the urban backyard all the way to dark rural skies and with this guide the journey can be smooth The Backyard Astronomer's Field Guide David Dickinson,2020-07-21 Discover Beautiful Nebulas Constellations Deep Sky Objects and More with Your Telescope David Dickinson co author of *The Universe Today Ultimate Guide to Viewing the Cosmos* has created the ultimate field guide for backyard astronomers Whether you want to impress viewers at a star party or learn what you can see with your new telescope David shows you how to find the most impressive views the night sky has to offer

Broken down by month and by hemisphere to ensure you get the best possible view David shows you how to find objects like spiral galaxies stunning sights in the Milky Way and stars that bring the wow factor to astronomy With 44 sky charts and David's expertise it's like having a pro astronomer out in the field with you **A Stargazing Program for Beginners** Jamie Carter, 2015-11-20 Sets out a simple month by month program to reveal all of the night sky's biggest and most beautiful secrets in just one year and with only a few hours of stargazing each month By investing just an hour a week and 50 in binoculars it's possible to learn a few simple techniques and quickly gain a real insight into the night sky's ever changing patterns and what they tell us about Earth the seasons and ourselves Searching more for a learned appreciation of nature and our exact place within the cosmos than academic scientific knowledge science and travel writer Jamie Carter takes the reader on a 12 month tour of the night sky's incredible annual rhythms that say so much about Earth During the journey he learns about the celestial mechanics at work in the skies above that are to the beginner almost beyond belief As well as the vital constellations and clusters and the weird and wonderful nebulas he searches out dark sky destinations across the globe that help increase knowledge and give a new perspective on familiar night sky sights On the journey he witnesses a solar eclipse and grapples with star charts binoculars smartphone apps telescopes spots satellites and attempts basic astro photography By year's end the reader will be able to glance at the night sky from anywhere on the planet and tell what direction he or she is facing what time it is where all the planets are and even where the Galactic Center Point is
