## Nice Book Traveling Prehistoric Seas Critical Transoceanic:

*Traveling Prehistoric Seas* Alice Beck Kehoe, 2016    *Staple to Superfood* Q. Edward Wang, 2025-12-16 Sweet potatoes were among the American crops Christopher Columbus brought back to Europe where they were thought to be an aphrodisiac In China this versatile root became a staple that fueled rapid population growth Introduced to Japan to stave off famine sweet potatoes later sustained the country's imperial expansion Because this hardy plant can thrive in almost any soil it has long been cultivated as a subsistence crop in Southeast Asia Africa and Oceania In recent years Western health experts have begun touting the humble sweet potato as a superfood with numerous nutritional benefits Considering these events and many others *Staple to Superfood* explores the sweet potato's rich history and remarkable global influence Q. Edward Wang demonstrates how this resilient root has not only nourished communities but also defined their identities Tracing its journeys through the intricate networks of global trade and cultural exchange he shows how the sweet potato transformed agricultural practices culinary traditions and social structures worldwide From the Americas to Europe to Asia and the Pacific the spread of this crop illuminates the varied paths that global development has taken Wang also contrasts the sweet potato with its botanically unrelated namesake the white potato Blending agricultural cultural and historical perspectives *Staple to Superfood* offers a fresh look at the power of food to transform societies It is a compelling exploration of how the sweet potato shaped the modern world and continues to influence global food systems today

*Ancient Ocean Crossings* Stephen C. Jett, 2017-06-06 Paints a compelling picture of impressive pre Columbian cultures and Old World civilizations that contrary to many prevailing notions were not isolated from one another In *Ancient Ocean Crossings* Reconsidering the Case for Contacts with the Pre Columbian Americas Stephen Jett encourages readers to reevaluate the common belief that there was no significant interchange between the chiefdoms and civilizations of Eurasia and Africa and peoples who occupied the alleged terra incognita beyond the great oceans More than a hundred centuries separate the time that Ice Age hunters are conventionally thought to have crossed a land bridge from Asia into North America and the arrival of Columbus in the Bahamas in 1492 Traditional belief has long held that earth's two hemispheres were essentially cut off from one another as a result of the post Pleistocene meltwater fed rising oceans that covered that bridge The oceans along with arctic climates and daunting terrestrial distances formed impermeable barriers to interhemispheric communication This viewpoint implies that the cultures of the Old World and those of the Americas developed independently Drawing on abundant and concrete evidence to support his theory for significant pre Columbian contacts Jett suggests that many ancient peoples had both the seafaring capabilities and the motives to cross the oceans and in fact did so repeatedly and with great impact His deep and broad work synthesizes information and ideas from archaeology geography linguistics climatology oceanography ethnobotany genetics medicine and the history of navigation and seafaring making an innovative and persuasive multidisciplinary case for a new understanding of human societies and their diffuse but interconnected development

Girl

Archaeologist Alice Beck Kehoe, 2022 Choice Outstanding Academic Title Girl Archaeologist recounts Alice Kehoe's life begun in an era very different from the twenty first century in which she retired as an honored elder archaeologist She persisted against entrenched patriarchy in her childhood at Harvard University and as she did fieldwork with her husband in the northern plains A senior male professor attempted to quash Kehoe's career by raping her Her Harvard professors refused to allow her to write a dissertation in archaeology Universities paid her less than her male counterparts Her husband refused to participate in housework or childcare Working in archaeology and in the histories of American First Nations Kehoe published a series of groundbreaking books and articles Although she was denied a conventional career through her unconventional breadth of research and her empathy with First Nations people she gained a wide circle of collaborators and colleagues Throughout her career Kehoe found and fostered a sisterhood of feminists strong bright women archaeologists anthropologists and ethnohistorians who have been essential to the field Girl Archaeologist is the story of how one woman pursued a professional career in a male dominated field during a time of great change in American middle class expectations for women
