

CAMERA CONTROLS

MANUAL CONTROLS ON YOUR NIKON

Use these buttons, displays and dials when you switch to M mode

1: M mode

On most Nikon D-SLRs you'll find three semi-transparent mode dials (one for 'professional' models); you press the Mode button and turn the rear dial to swap between modes.

2: Rear (main) command dial

You turn this to change the shutter speed. This is displayed on the top LCD panel (or your SLR has one) or the LCD on the rear.

3: Front (sub) command dial

(On cameras with two command dials/D300 and up) you use the front dial to change the lens aperture setting.

4: EV compensation button

On D3000- and D5200-series cameras, you hold down this button while turning the rear dial to change the lens aperture.

5: Exposure settings

The info display on the rear LCD shows you what your current shutter speed, lens aperture and ISO settings are.

6: Exposure indicator

This helps you set the exposure using readings from the camera's built-in meter. The position on the display tells you just how close you are to this reading.

ON THE BUTTON

HOW TO USE THE EXPOSURE INDICATOR

Even when you're in manual mode, your Nikon D-SLR will still measure the light for you

01 Switch to manual

On this D5200 and other 'consumer' Nikons, the manual setting is on the main mode dial. On pro SLRs from the D300s up, press and hold the 'Mode' button and turn the rear command dial.

02 Set a shutter speed

You're now in charge of the exposure settings! Turn the rear command dial and pick a shutter speed suitable for the conditions. For outdoor shots, 1/125 sec is a good starting point.

03 Adjust the aperture

Now adjust the lens aperture to get the correct exposure. On cameras with two command dials, use the front dial. On those with one, hold the EV compensation button down and turn the rear dial.

04 Interpret and adjust

Now watch the exposure indicator on the LCD. Your aim is to centre the exposure at the 'zero' point, but remember that this is just a recommended exposure – you can interpret and adjust it.

the best Nikon d3500 user's experience. Read on to find out more. The Nikon D3500 is a 24 mp entry level DSLR that has an APS C CMOS sensor that is much lighter, cheaper, and much longer battery duration than its predecessor, the D3400. The camera is made perfectly for individuals that are just getting into photography as it features a Guide Mode that teaches the handler how to shoot photography in different situations. The key specifications of this version include ISO range of 100-2500, EXPEED 4 image processor, 24 MP APS C CMOS sensor, Bluetooth for transferring images to other devices, Battery rated at 1550 shots per charge, CIPA 921 k dot fixed LCD screen, Full HD 1080 60p video capacity, ability to shoot continuously at five frames per second, and lastly an 11 point autofocus system that works through the optical viewfinder. Although the D3400 that the D3500 replaced is still a good camera, the D3500 makes things much better and the new APS C sensor it features is still one of the best you can find. Similarly, the camera is made perfectly for both individuals that are just getting into photography as well as for professionals. Hence, the essence of this user's manual is to teach you how to easily shoot and master photography in different situations. Below are some of the topics this book will focus on:

- Using USB Cable to connect the D3500 to a Computer
