Machine Learning Phil Bernstein, 2025-09-01

The advent of machine learning based AI systems demands that our industry does not just share toys but builds a new sandbox in which to play with them. Phil Bernstein The profession is changing. A new era is rapidly approaching when computers will not merely be instruments for data creation, manipulation, and management but empowered by artificial intelligence they will become agents of design themselves. Architects need a strategy for facing the opportunities and threats of these emergent capabilities or risk being left behind. Architecture's best known technologist Phil Bernstein provides that strategy. Divided into three key sections Process, Relationships, and Results, Machine Learning lays out an approach for anticipating, understanding, and managing a world in which computers often augment but may well also supplant knowledge workers like architects. Armed with this insight, practices can take full advantage of the new technologies to future-proof their business. Features chapters on Professionalism, Tools, and technologies, Laws, policy, and risk, Delivery, means and methods, Creating, consuming, and curating data, Value propositions, and business models.
